Weak-instrument-robust inference

Tests of joint significance of endogenous regressors B1 in main equation

Ho: B1=0 and orthogonality conditions are valid

Anderson-Rubin Wald test F(9,51)= 1.02 P-val=0.4396

Anderson-Rubin Wald test Chi-sq(9)= 9.33 P-val=0.4071

Stock-Wright LM S statistic Chi-sq(9)= 6.30 P-val=0.7100

NB: Underidentification, weak identification and weak-identification-robust test statistics cluster-robust

Number of clusters N_clust = 52

Number of observations N = 191505

Number of regressors K = 10

Number of endogenous regressors K1 = 9

Number of instruments L = 10

Number of excluded instruments L1 = 9

Number of partialled-out regressors/IVs = 99

NB: K & L do not included partialled-out variables

IV (2SLS) estimation

Estimates efficient for homoskedasticity only

Statistics robust to heteroskedasticity and clustering on tsd_state

Number of clusters (tsd_state) = 52 Number of obs = 191505

F(10, 51) = 1.72

Prob > F = 0.1011

Total (centered) SS = 10449.58886 Centered R2 = 0.0001
 Total (uncentered) SS = 10449.58886 Uncentered R2 = 0.0001
 Residual SS = 10448.81207 Root MSE = .2336

 Number of excluded instruments L1 = 3
 Number of partialled-out regressors/IVs = 97
 NB: K & L do not included partialled-out variables

IV (2SLS) estimation

Estimates efficient for homoskedasticity only
 Statistics robust to heteroskedasticity and clustering on tsd_state

Number of clusters (tsd_state) =	50	Number of obs =	43043
		F(1, 49) =	0.01
		Prob > F =	0.9375
Total (centered) SS =	3526.097455	Centered R2 =	-0.0000
Total (uncentered) SS =	3526.097455	Uncentered R2 =	-0.0000
Residual SS =	3526.104221	Root MSE =	.2862

twproll36	Coef.	Robust Std. Err.	z	P> z	[95% Conf. Interval]	
mototkt	-.000122	.001531	-0.08	0.936	-.0031227	.0028787

Underidentification test (Kleibergen-Paap rk LM statistic): 9.720
 Chi-sq(3) P-val = 0.0211

Weak identification test (Cragg-Donald Wald F statistic): 8.1e+04
 (Kleibergen-Paap rk Wald F statistic): 6.1e+04

Stock-Yogo weak ID test critical values:

5% maximal IV relative bias	13.91
10% maximal IV relative bias	9.08
20% maximal IV relative bias	6.46
30% maximal IV relative bias	5.39
10% maximal IV size	22.30
15% maximal IV size	12.83
20% maximal IV size	9.54
25% maximal IV size	7.80
