

Financial Section

A MESSAGE FROM THE CHIEF FINANCIAL OFFICER

I am pleased to join Acting Commissioner Kijakazi to issue our fiscal year (FY) 2021 *Agency Financial Report* (AFR). This report highlights our accomplishments in delivering Social Security services to promote the economic security of the public, and demonstrates our commitment to making efficient use of funds the American people entrust to us.

I am proud to report that for the 28th consecutive year, we received an unmodified audit opinion on our financial statements from our independent auditors. An unmodified audit opinion confirms that our statements present fairly our financial position and are free of material misstatement. Our independent auditors also issued an unmodified opinion on the effectiveness of our internal control over financial reporting. They determined that we had no material weaknesses yet continued to cite three significant deficiencies identified in prior years. The significant deficiencies concern internal control over certain financial information systems controls, information systems risk

management, and internal control over accounts receivable with the public (benefit overpayments).

We resolve the deficiencies identified by audits through risk-based corrective action plans to mitigate risks and strengthen our control environment. We focus on increasing cross-component collaboration by involving subject matter experts and leaders across the agency. While each year we make progress in remediating elements of these significant deficiencies, we face challenges, such as the ever-changing cybersecurity landscape in which we operate. Many elements of our remediation plans will take time to implement. Nonetheless, we remain committed to continuous improvement. We provide additional information on the auditors' findings and our corrective actions in the *Analysis of Systems, Controls, and Legal Compliance* and *Report of Independent Certified Public Accountants* sections of this report.

I am pleased to announce that we received a Certificate of Excellence in Accountability Reporting (CEAR) from the Association of Government Accountants for our FY 2020 AFR. This is our 23rd consecutive year receiving this prestigious award, which is an unprecedented accomplishment in Federal financial management, and demonstrates our commitment to being good stewards of taxpayer dollars. In addition, we received a CEAR Best-In-Class award for exceptional reporting on our Coronavirus Disease 2019 (COVID-19) pandemic response in our FY 2020 AFR.

The accomplishments in this report reflect our employees' dedication. They work hard every day to ensure the success of our financial management program, while helping to carry out our mission and provide the quality of service the public expects and deserves.

For additional information on how the Office of the Chief Financial Officer contributed to accomplishing our mission, please refer to the *Financial Management Initiatives Advancing Our Mission* section beginning on the following page. We will continue to build upon our sustained commitment to financial excellence to ensure optimal stewardship of the resources we manage.

Respectfully,

Michelle A. King

Baltimore, Maryland
November 10, 2021

FINANCIAL MANAGEMENT INITIATIVES

ADVANCING OUR MISSION

Our Chief Financial Officer (CFO) also serves as the Performance Improvement Officer. This dual role provides a unique position overseeing the full life cycle of agency initiatives and goals—from the development of the *Agency Strategic Plan*, which drives budget decisions and annual performance plans, to the financial management of resources and performance reporting. The mission of the Office of the Chief Financial Officer (OCFO) is financial management excellence. The following are key financial management initiatives that advance this mission and the agency’s mission, Strategic Goals, and Objectives:

DEBT MANAGEMENT

- **Remittance Modernization to Improve Service Delivery:** OCFO is leading our remittance modernization efforts. Historically, our remittance process was a largely manual paper workload handled by our Mid-Atlantic Program Service Center (MATPSC). The MATPSC remittance process requires a method of payment (check, money order, or debit or credit card) and a corresponding payment coupon necessary to update a debtor’s record. In FY 2021, as part of the Debt Management Product, we implemented several improvements to our remittance process. These enhancements, along with our previously implemented Social Security Electronic Remittance System, now account for almost 50 percent of our remittance activity.
 - **Pay.gov:** In January 2021, we partnered with the Department of the Treasury’s (Treasury) Pay.gov team to implement our first online repayment option for Old-Age, Survivors, and Disability Insurance (OASDI) beneficiaries and Supplemental Security Income (SSI) recipients to repay benefit overpayments via credit or debit card and an automated clearing house (ACH) (i.e., a checking or savings account). As of September 30, 2021, we processed 323,585 remittances and collected \$79.5 million through Pay.gov.
 - **Lockbox Service:** Also, in January 2021, we partnered with Treasury to use U.S. Bank, a financial agent for Treasury, to implement a lockbox service to assist with our paper remittance processing efforts. In February 2021, we began routing paper remittances to the lockbox for processing, which relieved our Remittance Accounting Unit, and allowed them to focus on other workloads. As of September 30, 2021, we processed 196,554 remittances and collected \$37.7 million through the lockbox service.
 - **Online Bill Pay:** In July 2021, we implemented Online Bill Pay (OLBP), allowing debtors to make a one-time or recurring ACH draft from a bank account using a personal computer or mobile phone. Prior to this implementation, OLBP remittances defaulted to paper checks. As of September 30, 2021, we processed 419 remittances and collected \$0.1 million through OLBP.
- **Program Debt Write-Off:** In FY 2021, we completed a multi-phase project to analyze debt we have determined to be delinquent and uncollectible for potential termination of collection by the agency. By terminating collection activity on uncollectible debts, we will better reflect current receivables on our records and financial statements, as well as reduce the number of actions from the processing center pending backlog. However, while we are terminating active collection efforts, the debt will remain on the individual’s agency record to be collected in the future, where appropriate and applicable. If eligible, we will refer these delinquent debts to the Treasury Offset Program for external collection action.

PUBLIC SERVICE

- **Economic Impact Payments:** The *American Rescue Plan Act of 2021* (ARP Act) authorized a third round of Economic Impact Payments (EIP). On March 17, 2021, we executed a reimbursable agreement with Treasury’s Internal Revenue Service (IRS) to support the issuance of a third round of EIPs. The ARP Act provided that eligible taxpayers would receive a third EIP of up to \$1,400 for individuals or \$2,800 for married

couples. Individuals would also receive \$1,400 for each qualifying dependent child. Based upon their income, some of our OASDI beneficiaries and SSI recipients are not required to file Federal tax returns. OCFO worked closely with IRS and Treasury's Bureau of Fiscal Service to ensure that all eligible OASDI beneficiaries and SSI recipients received their EIPs automatically. We sent notices to 8.5 million SSI recipients notifying them of actions they can take to receive missing EIPs and to find information about the Child Tax Credits authorized by ARP.

- **Keeping Employees and the Public Safe:** Our highest priority during this unprecedented time has been to provide mission-critical services while safeguarding the health of the public and our employees. We transitioned to telework and in FY 2021 conducted most workloads through online, telephone, and video service with limited in-office service for critical situations. OCFO procured supplies for the COVID-19 pandemic, including health and safety items for our offices nationwide, as well as permanent and temporary barriers.
- **Advancing Equity in Our Programs:** Equity is the bedrock of American democracy, and our diversity is one of our country's greatest strengths. In FY 2021, we established the Agency Equity Team in accordance with Executive Order (EO) 13985, *Advancing Racial Equity and Support for Underserved Communities through the Federal Government*, to coordinate agency-wide and interagency efforts, and discuss opportunities to ensure equity in our programs. The Agency Equity Team has established several workgroups to address program and policy topics regarding disparities that underserved communities and individuals may face in accessing programs and services, and we are working on activities in accordance with the EO.

EFFICIENCY

- **Compassionate And REsponsive Service Plan:** In FY 2021, as a result of our Compassionate And REsponsive Service plan, the Administration's and Congress' support, and the hard work of our employees, we reduced the hearings backlog to the lowest level in 20 years. In FY 2021, we received \$50 million in dedicated funding to reduce the hearings backlog. Over the last 5 years, Congress has provided \$440 million in special funding dedicated to address the hearings backlog. From budget planning, execution, and reporting, to providing ongoing medical and vocational contractual support for hearings cases, OCFO remains engaged to improve the hearings process.
- **Large Site Activities:** OCFO continues to identify opportunities to improve the use of space at our large site facilities, while simultaneously reducing costs. In FY 2021, we continued renovations at our headquarters facilities, which will allow us to move staff onto campus to vacate the Security West building at the end of FY 2023 – one year ahead of schedule. Once complete, this project will yield \$17 million in annual rent savings. We also collaborated with the General Services Administration (GSA) on a prospectus-level project for our space requirements in the National Capital Region (which includes Washington, DC, and parts of Maryland and Virginia), where GSA is negotiating a new lease to consolidate our staff in a single location with significant space savings. These projects leverage our revised space allocation standards that will enable us to reduce our real property footprint, reduce costs, and meet the objectives associated with OMB's real property capital planning requirements and the *Federal Assets Sale and Transfer Act*. We also collaborated with GSA on a prospectus-level project at the Frank Hagel Federal Building in Richmond, CA that will address needed infrastructure updates to the building.
- **Robotic Process Automation:** In FY 2020, OCFO implemented robotic process automation (RPA) that allowed for the automated posting of returned SSI payments, made after death, to the Supplemental Security Income Record. In FY 2021, this RPA automatically posted over 29,000 transactions, averaging 3 seconds per transaction, versus the 3 minutes per transaction required in the previous manual process. OCFO added RPA that verifies the automated posting of returned SSI payments, made after death, to the Supplemental Security Income Record. Under the manual verification process, we processed an average of 20,000 returned payments annually, spending approximately 5 minutes per transaction. From the May 2021 implementation through the end of FY 2021, the RPA processed over 11,000 verifications, averaging about 20 seconds per transaction.
- **Climate Change:** In support of the Administration's goal to combat the climate crisis, OCFO developed the Climate Action Plan in August 2021. Our Climate Action Plan demonstrates our commitment to bolstering adaptation to climate change and conserving resources by encouraging employees and contractors to reduce

energy consumption, water usage, and the amount of waste produced, as well as promote re-use and recycling whenever possible. We established an internal working group consisting of key stakeholders to develop a plan to meet the clean and zero emissions vehicles mandated by EO 14008, and continue improving our understanding of climate change risks through interagency initiatives and the National Climate Task Force.

INTERNAL CONTROLS

- **Enterprise Risk Management:** During FY 2021, OCFO continued to mature our Enterprise Risk Management (ERM) program. We have implemented a multi-year strategy that will further integrate our existing internal control and risk management frameworks with our strategic planning and review processes. We further aligned ERM with our Cybersecurity and Enterprise Fraud Risk Management programs, including developing an Integration Framework to assist with integrating agency programs with ERM, finalizing our risk appetite statement; conducting market research on obtaining a Governance, Risk, and Compliance Tool to assist with our ERM efforts; and developing an evaluation process to determine our ERM maturity.

FINANCIAL STATEMENTS AND ADDITIONAL INFORMATION

Our agency's financial statements and additional information for fiscal years (FY) 2021 and 2020 consist of the following:

- The **Consolidated Balance Sheets** present, as of September 30, 2021 and 2020, amounts of economic benefits we owned or managed (assets), amounts we owed (liabilities), and residual amounts we retained, comprising the difference (net position). We provide a Balance Sheet by major program as additional information.
- The **Consolidated Statements of Net Cost** present the net cost of operations for the years ended September 30, 2021 and 2020. Our net cost of operations includes the gross costs incurred less any exchange revenue earned from activities presented by our major programs. By disclosing the gross cost and net cost of the entity's programs, the Consolidated Statements of Net Cost provide information that can be related to the outputs and outcomes of programs and activities. We provide a Schedule of Net Cost to show the components of net cost activity as additional information.
- The **Consolidated Statements of Changes in Net Position** present the change in net position for the years ended September 30, 2021 and 2020. Changes to the two components of net position, Unexpended Appropriations and Cumulative Results of Operations, affect its balance. The Statement format is designed to display both components of net position separately to enable the user to better understand the nature of changes to net position as a whole. We provide a Schedule of Changes in Net Position to present the change in net position by major program as additional information.
- The **Combined Statements of Budgetary Resources** present the budgetary resources available to us, the status of these resources, and the outlay of budgetary resources for the years ended September 30, 2021 and 2020. We provide an additional Schedule of Budgetary Resources as Required Supplementary Information to present budgetary resources by major program.
- The **Statements of Social Insurance** present the present value for the 75-year projection period of the estimated Old-Age and Survivors Insurance (OASI) and Disability Insurance (DI) future noninterest income and cost expected to arise from the formulas specified in current law for current and future program participants. We present the difference between these values on both an open group and a closed group basis, both including and excluding the value of the combined OASI and DI Trust Fund reserves at the beginning of the period. This information is presented for the current year and for each of the four preceding years.
- The **Statements of Changes in Social Insurance Amounts** reconcile the changes, from one 75-year valuation period to the next, in the present value for the 75-year projection period of the estimated OASI and DI future noninterest income less estimated future cost for current and future participants (the open group measure). The Statements show two reconciliations: (1) change from the period beginning on January 1, 2020 to the period beginning on January 1, 2021; and (2) change from the period beginning on January 1, 2019 to the period beginning on January 1, 2020. The Statements identify several categories of changes and provide reasons for significant changes in the accompanying notes.
- The **Required Supplementary Information: Social Insurance** presents required long-range cash flow projections, the long-range projections of the ratio of contributors to beneficiaries, and the sensitivity analysis illustrating the effect of the changes in the most significant assumptions on the actuarial projections and present values for the 75-year projection period of the OASI and DI programs. The financial and actuarial disclosures include a narrative describing the program, including how the program is financed and how benefits are calculated, as well as an interpretive analysis of trends revealed by the data.

	Estimates Reported in Prior Years				
	2021	2020	2019	2018	2017
Present value for the 75-year projection period from or on behalf of: (Note 17)					
<i>Participants who, in the starting year of the projection period, have attained eligibility age (age 62 and over):</i>					
Noninterest income	\$ 1,766	\$ 1,720	\$ 1,552	\$ 1,451	\$ 1,374
Cost for scheduled future benefits	19,785	18,269	16,895	15,862	14,668
Future noninterest income less future cost	(18,019)	(16,549)	(15,344)	(14,411)	(13,294)
<i>Participants who have not yet attained retirement eligibility age (ages 15–61):</i>					
Noninterest income	37,465	35,215	33,602	31,849	30,305
Cost for scheduled future benefits	64,932	59,784	55,826	52,248	50,181
Future noninterest income less future cost	(27,467)	(24,569)	(22,224)	(20,399)	(19,876)
Present value of future noninterest income less future cost for current participants (closed group measure)	(45,486)	(41,118)	(37,568)	(34,810)	(33,170)
Combined OASI and DI Trust Fund reserves at start of period	2,908	2,897	2,895	2,892	2,848
Closed group - Present value of future noninterest income less future cost for current participants plus combined OASI and DI Trust Fund reserves at start of period	\$ (42,578)	\$ (38,220)	\$ (34,673)	\$ (31,918)	\$ (30,322)
Present value for the 75-year projection period from or on behalf of: (Note 17)					
<i>Future participants (those under age 15, and to be born during period):</i>					
Noninterest income	\$ 39,349	\$ 36,964	\$ 35,311	\$ 31,788	\$ 30,452
Cost for scheduled future benefits	16,604	15,542	14,508	13,035	12,639
Future noninterest income less future cost	22,745	21,421	20,804	18,753	17,813
Present value of future noninterest income less future cost for current and future participants (open group measure)	(22,742)	(19,696)	(16,764)	(16,057)	(15,357)
Combined OASI and DI Trust Fund reserves at start of period	2,908	2,897	2,895	2,892	2,848
Open group - Present value of future noninterest income less future cost for current and future participants plus combined OASI and DI Trust Fund reserves at start of period	\$ (19,833)	\$ (16,799)	\$ (13,869)	\$ (13,166)	\$ (12,509)

Notes:

Components may not sum to totals because of rounding. The accompanying notes are an integral part of these financial statements.

Present values used in this presentation are based on the full amounts of estimated noninterest income and the cost of providing benefits at the levels scheduled under current law, even after the OASI and DI Trust Fund reserves are depleted.

Future noninterest income and future cost are estimated over the appropriate 75-year period.

Notes:

Components may not sum to totals because of rounding. The accompanying notes are an integral part of these financial statements.

Present values used in this presentation are based on the full amounts of estimated noninterest income and the cost of providing benefits at the levels scheduled under current law, even after the OASI and DI Trust Fund reserves are depleted.

Future noninterest income and future cost are estimated over the appropriate 75-year period.

We provide high-level descriptions of the reason for the change in present value from year to year in Note 17, Social Insurance Disclosures.

NOTES TO THE BASIC FINANCIAL STATEMENTS FOR THE YEARS ENDED SEPTEMBER 30, 2021 AND 2020

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

REPORTING ENTITY

The Social Security Administration (SSA), as an independent agency in the executive branch of the United States (U.S.) Government, is responsible for administering the Nation's Old-Age and Survivors and Disability Insurance (OASDI) programs and the Supplemental Security Income (SSI) program. SSA is considered a separate reporting entity for financial reporting purposes. Our financial statements have been prepared to report the financial position, net cost, changes in net position, budgetary resources, the present value for the 75-year projection period for social insurance, and the changes in the present value between the current valuation period and prior valuation period, as required by the Office of Management and Budget (OMB) in OMB Circular No. A-136, *Financial Reporting Requirements*.

The consolidated and combined financial statements include the accounts of all funds under SSA control, consisting primarily of the OASI and DI Trust Funds, SSA's Limitation on Administrative Expenses (LAE), four general fund appropriations, three receipt accounts, and one special fund. The OASI and DI Trust Funds consist of earmarked receipts used to fund benefit payment and other related expenditures. General fund appropriations represent activities that receive appropriation authority from the Department of the Treasury's (Treasury) General Fund based on law. SSA's receipt accounts contain funds from collections that are not identified by law for another account for a specific purpose; whereas, special fund accounts contain funds collected that are identified by law for a specific purpose.

LAE is a mechanism to fund our administrative operations and is considered a subset of the OASI and DI Trust Funds. The four general funds are the Payments to Social Security Trust Funds (PTF), SSI Program, Office of the Inspector General (OIG), and Special Veterans Benefits (Title VIII) Program. The three receipt accounts are SSI Overpayment Collections, the General Fund's portion of the SSI State Supplementation fees, and SSI Attorney fees. The one special fund is SSA's portion of the SSI State Supplementation fees. SSA's financial statements also include OASI and DI investment activities performed by Treasury.

SSA's financial activity has been classified and reported by the following program areas: OASI, DI, SSI, LAE, and Other. Other consists primarily of PTF appropriations activity, but also contains SSI Overpayment Collections and other non-material activities.

ACCOUNTING PRINCIPLES

The financial statements have been prepared from the accounting records of SSA on an accrual basis, in conformity with generally accepted accounting principles (GAAP) of the United States of America for Federal entities and the form and content for entity financial statements specified by OMB in Circular No. A-136. The Combined Statements of Budgetary Resources and related disclosures provide information about how budgetary resources were made available as well as the status at the end of the period. It is the only Statement predominately derived from an entity's budgetary general ledger in accordance with budgetary accounting rules, which are incorporated into GAAP for the Federal Government. GAAP for Federal entities are the standards prescribed by the Federal Accounting Standards Advisory Board (FASAB). The preparation of financial statements, in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Accounting standards require all reporting entities to disclose that accounting standards allow certain presentations and disclosures to be modified, if needed, to prevent the disclosure of classified information.

FUND BALANCE WITH TREASURY

SSA's Fund Balance with Treasury, shown on the Consolidated Balance Sheets, is the aggregate amount of funds in SSA's accounts with Treasury for which SSA is authorized to make expenditures and pay liabilities. Refer to Note 3, Non-Entity Assets, and Note 4, Fund Balance with Treasury.

INVESTMENTS

Daily deposits received by the OASI and DI Trust Funds that are not required to meet current expenditures are invested in interest-bearing obligations of the U.S. Government. The OASI and DI Trust Fund balances may be invested only in interest-bearing obligations of the U.S. or in obligations guaranteed as to both principal and interest by the U.S. as provided by Section 201 (d) of the *Social Security Act*. These investments consist of Treasury special-issue securities. Special-issue securities are special public debt obligations for purchase exclusively by the OASI and DI Trust Funds; therefore, they are non-marketable securities. They are purchased and redeemed at face value, which is the same as their carrying value on the Consolidated Balance Sheets. Refer to Note 5, Investments and Interest Receivable.

ACCOUNTS RECEIVABLE, NET

SSA accounts receivable represent unpaid amounts due to the agency. Intragovernmental Accounts Receivable, Net primarily represent amounts to be paid from the Hospital Insurance (HI) and Supplemental Medical Insurance (SMI) Trust Funds to the LAE Appropriation. Accounts Receivable, Net With the Public consist mainly of monies due to SSA from OASI, DI, and SSI beneficiaries who received benefits in excess of their entitlement, as well as amounts due from the States to cover underpayments due to the SSI recipients. Intragovernmental Accounts Receivable, Net also includes amounts related to Section 4003 of the *Coronavirus Aid, Relief, and Economic Security Act* (CARES Act), Emergency Relief and Taxpayer Protection, which allows Treasury to make loans, loan guarantees, and other investments of up to \$500 billion to eligible businesses, States, and municipalities impacted by the Coronavirus Disease 2019 (COVID-19) pandemic. This legislation designates the OASI Trust Fund as the recipient of any interest and other proceeds associated with the loans, loan guarantees, and other investments after repayments of any amounts provided are made to Treasury.

During FY 2020, we re-evaluated our program debt portfolio, specifically delinquent and uncollectible debt with the public that we were pursuing. We found that we were pursuing debt that was largely uncollectible, thereby inefficiently using our processing centers' limited resources. In FY 2020, we targeted and wrote-off a portion of our OASI and DI debt that we determined to be uncollectible to start our new debt write-off process, which contributed to the increase in write-offs compared to previous years. In FY 2021, we continued to evaluate our delinquent debt and have continued this write-off process for our SSI program debt, as well as additional OASI and DI debt. As part of this new debt write-off initiative, we have developed an automated process to evaluate debt going forward for potential write-offs.

While this debt is being written-off, it remains available for future collection. SSA can pursue collection efforts if the debtor becomes entitled to OASDI or SSI benefits. At that point, we would re-establish the accounts receivable, and pursue collections. In addition, if eligible, we will refer these delinquent debts to the Treasury Offset Program for external collection action.

SSA does not apply an allowance for doubtful accounts to determine the net value of Intragovernmental Accounts Receivable. According to FASAB's Statement of Federal Financial Accounting Standards (SFFAS) No. 1, *Accounting for Selected Assets and Liabilities*, an allowance for estimated uncollectible amounts should be recognized to reduce the gross amount of receivables to its net realizable value; however, no potential losses have been assessed on intragovernmental receivables based on individual account and program analysis. For programmatic accounts receivable with the public, SSA allows for all delinquent debt two years and older. SSA annually recalculates a ratio of allowance for doubtful accounts and applies the allowance ratios against any remaining debt that is not delinquent two years or more. This is calculated by applying a moving five-year average of uncollectible receivable ratios and, by comparing each program's collections to new debt while considering

turnover rates, against outstanding receivables. Our total allowance for doubtful accounts includes the age-specific delinquent debt two years and older plus the uncollectible portion of our remaining accounts receivable, not delinquent two years or more, based on the allowance rates. Refer to Note 6, Accounts Receivable, Net.

GENERAL PROPERTY, PLANT, AND EQUIPMENT

SSA records property, plant, and equipment (PP&E) in the LAE program, but the PP&E represents the capital assets purchased by its funding sources. SFFAS No. 10, *Accounting for Internal Use Software*, requires the capitalization of internally developed, contractor-developed, and commercial off-the-shelf software. SSA classifies PP&E into several categories. The capitalization threshold for most PP&E categories is \$100 thousand. Deferred Charges, which include fixtures and the Telephone Services Replacement Project, are capitalized with no threshold and \$100 thousand, respectively. Site preparation for Automated Data Processing (ADP) and Telecommunications, Buildings and Other Structures, Internal Use Software, excluding commercial off-the-shelf software, and certain leasehold improvements for Federal leased buildings purchased by the Trust Funds are capitalized with no threshold. Refer to Note 7, Property, Plant, and Equipment, Net.

BENEFITS DUE AND PAYABLE

SSA accrues liabilities for OASI and DI benefits due for the current month, which by statute, are not paid until the following month. In addition, SSA accrues liabilities on benefits for past periods that have not completed processing by the close of the period, such as adjudicated and unadjudicated hearings and appeals and civil litigation cases. Refer to Note 9, Liabilities.

BENEFIT PAYMENTS

SSA recognizes the cost associated with payments in the period the beneficiary or recipient is entitled to receive the payment. OASI and DI benefit disbursements are generally made after the end of each month. SSI disbursements are generally made on the first day of each month. By law, if the monthly disbursement date falls on a weekend or a federally recognized holiday, SSA is required to make the payment on the preceding business day. In these situations, the beneficiary or recipient is deemed entitled to receive the payment as of the payment date, as they have met all payment and eligibility requirements.

ADMINISTRATIVE EXPENSES AND OBLIGATIONS

SSA administrative expenses are incurred in the LAE appropriation. Section 201 (g) of the *Social Security Act* requires the Commissioner of Social Security to determine the proper share of costs incurred during the fiscal year to be charged to the appropriate fund. Accordingly, SSA subsequently allocates administrative expenses during each month to the appropriate OASI, DI, HI, and SMI Trust Fund and general fund accounts on the Statements of Net Cost based on percentages developed by SSA's Cost Analysis System (CAS). CAS uses agency workload data to develop annual percentages that are used to allocate the expenses. SSA initially makes all such distributions on an estimated basis and adjusts to actual each year, as provided for in Section 1534 of Title 31, United States Code (U.S.C.).

SSA incurs obligations in the LAE accounts as activity is processed. SSA incurs obligations in each of the financing sources once we record LAE's authority. The Centers for Medicare and Medicaid Services reports obligations that SSA incurred in the HI and SMI Trust Funds. Because SSA reports LAE with our financing sources (other than the HI/SMI Trust Funds) on the Combined Statements of Budgetary Resources and this Statement does not allow eliminations, we record LAE's obligations twice. This presentation is in conformance with OMB Circular No. A-136 to have the Combined Statements of Budgetary Resources in agreement with the required Budget Execution Reports (SF-133).

RECOGNITION OF FINANCING SOURCES

Tax revenue, which consists of funds transferred from the Treasury to the OASI and DI Trust Funds for employment taxes (*Federal Insurance Contributions Act (FICA)* and *Self-Employment Contributions Act (SECA)*), represents SSA's largest financing source. Additional financing sources consist of interest revenue from the OASI and DI Trust Fund investments, taxation on benefits, drawdown of funds for benefit entitlement payments and administrative expenses, appropriations, gifts, and other miscellaneous receipts. On an as-needed basis, funds are drawn from the OASI and DI Trust Funds to cover benefit payments. As governed by limitations determined annually by the U.S. Congress, funds are also drawn from the OASI and DI Trust Funds for SSA's operating expenses. To cover SSA's costs to administer a portion of the Medicare program, funds are drawn from the HI/SMI Trust Funds.

Appropriations Used includes payments and accruals for the activities that are funded from Treasury's General Fund.

Employment tax revenues are made available daily based on a quarterly estimate of the amount of FICA taxes payable by employers and SECA taxes payable from the self-employed. Adjustments are made to the estimates for actual taxes payable and refunds made. Employment tax credits (the difference between the combined employee and employer rate and the self-employed rate) are also included in tax revenues. Refer to Note 13, Tax Revenues.

Exchange revenue from sales of goods and services primarily include payments of fees SSA receives from those States choosing to have SSA administer their State Supplementation of Federal SSI benefits. Refer to Note 12, Exchange Revenues. SSA may use exchange revenue financing sources to pay for current operating expenses as specified by law.

FUNDS FROM DEDICATED COLLECTIONS

SFFAS No. 43, *Funds from Dedicated Collections*, requires separate presentation and disclosure of funds from dedicated collections balances in the financial statements. Generally, funds from dedicated collections are financed by specifically identified revenues, provided to the Government by non-Federal sources, often supplemented by other financing sources, which remain available over time. Funds from dedicated collections must meet the following criteria:

- A statute committing the Federal Government to use specifically identified revenues and/or other financing sources that are originally provided to the Federal Government by a non-Federal source only for designated activities, benefits, or purposes;
- Explicit authority for the fund to retain revenues and/or other financing sources not used in the current period for future use to finance the designated activities, benefits, or purposes; and
- A requirement to account for and report on the receipt, use, and retention of the revenues and/or other financing sources that distinguishes the fund from the Federal Government's general revenues.

SSA's funds from dedicated collections are the OASI and DI Trust Funds, funds collected through the taxation of Social Security benefits, and fees collected to cover a portion of SSA's administrative costs for SSI State Supplementation. Refer to Note 10, Funds from Dedicated Collections, for additional information.

USE OF ESTIMATES

The preparation of financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The Statements of Social Insurance and Statements of Changes in Social Insurance Amounts are based on the selection of accounting policies and the application of significant accounting estimates, some of which require management to make significant assumptions. Further, the estimates are based on current conditions and expectations of future conditions. Actual results could differ materially from the estimated amounts. Each Statement includes information to assist in understanding the effect of changes in assumptions to the related information. Refer to Note 17, Social Insurance Disclosures.

PRESENTATION CHANGE

Effective FY 2021, the Consolidated Balance Sheets and Consolidated Statements of Changes in Net Position presentations have been modified to comply with the required format in OMB's Circular No. A-136 and the FY 2021 U.S. Standard General Ledger Crosswalk. Note 5, Investments and Interest Receivable; Note 9, Liabilities; and Note 10, Funds from Dedicated Collections presentations have been modified to reflect the changes. Note 16, Reconciliation of Net Cost to Net Outlays has also been modified to comply with the Treasury prescribed crosswalk guide published in FY 2021. The FY 2020 balances have been presented in the new format for comparison purposes.

2. CENTRALIZED FEDERAL FINANCING ACTIVITIES

SSA's financial activities interact with, and are dependent on, the financial activities of the centralized management functions of the Federal Government that are undertaken for the benefit of the whole Federal Government. These activities include public debt, employee retirement, life insurance, and health benefit programs. However, SSA's financial statements do not contain the results of centralized financial decisions and activities performed for the benefit of the entire Government.

Financing for general fund appropriations reported on the Consolidated Statements of Changes in Net Position may be from tax revenue, public borrowing, or both. The source of this funding, whether tax revenue or public borrowing, has not been allocated to SSA.

SSA occupies buildings that the General Services Administration (GSA) leased or have been constructed using Public Building Funds. These financial statements reflect our payments to GSA for their lease, operations maintenance, and depreciation expenses associated with these buildings.

SSA's employees participate in the Office of Personnel Management (OPM) administered contributory Civil Service Retirement System (CSRS) or the Federal Employees' Retirement System (FERS). SSA makes matching contributions to FERS. Pursuant to Public Law 99-335, *Federal Employees' Retirement System Act of 1986*, FERS went into effect on January 1, 1987. FERS automatically covers employees hired after December 31, 1983. Employees hired prior to that date could elect to either join FERS or remain in CSRS. Refer to Note 14, Imputed Financing, for additional information.

SSA contributed \$15 and \$18 million for the years ended September 30, 2021 and 2020 to CSRS. SSA contributed \$838 and \$760 million for the years ended September 30, 2021 and 2020 to the basic FERS plan. One of the primary differences between FERS and CSRS is that FERS offers a savings plan to which SSA is required to contribute one percent of pay and match employee contributions up to an additional four percent of basic pay. SSA contributed \$220 and \$211 million for the years ended September 30, 2021 and 2020 to the FERS savings plan. All contributions include amounts paid and due and payable as of the end of the reporting period. These Statements do not reflect CSRS or FERS assets or accumulated plan benefits applicable to SSA employees since this data is only reported in total by OPM.

3. NON-ENTITY ASSETS

Non-entity assets are those assets that are held by an entity, but are not available to the entity. SSA displays our Non-Entity Assets in Chart 3a. The Non-Entity Assets are composed of: (1) SSI Federal and State benefit overpayments and underpayments classified as SSI Accounts Receivable, Net; (2) fees collected to administer Title VIII State Supplementation; and (3) deferred payroll taxes owed by SSA employees due to Treasury.

Chart 3a - Non-Entity Assets as of September 30:
(Dollars in Millions)

	2021			2020		
	Non-Entity Assets	Intra-agency Elimination	Net Assets	Non-Entity Assets	Intra-agency Elimination	Net Assets
Intragovernmental:						
Title VIII State Supp Fees	2	0	2	2	0	2
With the Public:						
SSI Fed/State Accounts Receivable, Net	3,858	(476)	3,382	4,439	(415)	4,024
Deferred Payroll Taxes	18	0	18	0	0	0
Total with the Public	3,876	(476)	3,400	4,439	(415)	4,024
Total	\$ 3,878	\$ (476)	\$ 3,402	\$ 4,441	\$ (415)	\$ 4,026

SSA has reduced the SSI Accounts Receivable, Net, by intra-agency eliminations (see discussion in Note 6, Accounts Receivable, Net). SSI accounts receivable is recognized as a non-entity asset. Public Law 101-517, *Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1991*, requires that collections from repayment of SSI Federal benefit overpayments be deposited in Treasury's General Fund. These funds, upon deposit, are assets of Treasury's General Fund, and will not be used by SSA as an SSI budgetary resource to pay SSI benefits or administrative costs. Prior to their collection, these SSI Federal benefit overpayments are recorded as SSI Accounts Receivable from the beneficiaries. SSA recognizes this receivable due from the beneficiary as a non-entity asset since the amount owed is due to Treasury's General Fund. In FY 2021, we continued to evaluate agency delinquent programmatic debt to identify and write-off amounts deemed uncollectible. This resulted in a decrease in SSI Accounts Receivable, Net, which can be seen in Chart 3a above. As part of this new debt initiative, we have also implemented an automated process to evaluate debt going forward and identify potential write-offs. When a beneficiary does not receive a full SSI State Supplemental benefit, SSA establishes an underpayment receivable. This receivable reflects the reimbursement due to SSA from the States to cover the unpaid benefit. SSA recognizes this receivable due from the States as a non-entity asset since the amount owed is due to the beneficiary.

SSA collects fees for administering Title VIII Supplementation benefit payments on behalf of the State of California. These funds, upon deposit, are assets of Treasury's General Fund and are a non-entity asset. Amounts collected during the fiscal year are classified as exchange revenue, and are included in the Fund Balance with Treasury as of September 30, 2021 and 2020.

On August 8, 2020, the President issued the *Memorandum on Deferring Payroll Tax Obligations in Light of the Ongoing COVID-19 Disaster*. This Memorandum deferred certain payroll taxes owed by employees whose pre-tax bi-weekly payroll payments were less than \$4,000 starting on September 1, 2020 through December 31, 2020. While the payroll tax is deferred, Treasury will be repaid any deferred taxes through employee payments beginning January 1, 2021 through December 31, 2021. SSA employees were informed that they will be responsible for repayment of the deferred taxes so a non-budgetary, non-federal receivable has been recorded. SSA recognizes the receivable owed by SSA employees due to Treasury as a non-entity asset.

Chart 3b provides a breakout between Non-Entity and Entity assets.

**Chart 3b - Non-Entity/Entity Asset Breakdown as of September 30:
(Dollars in Millions)**

	2021	2020
Non-Entity Assets	\$ 3,402	\$ 4,026
Entity Assets	2,889,915	2,945,036
Total Assets	\$ 2,893,317	\$ 2,949,062

4. FUND BALANCE WITH TREASURY

The Fund Balance with Treasury, shown on the Consolidated Balance Sheets, represents the total of all of SSA's undisbursed account balances with Treasury. Fund Balance with Treasury is an asset to SSA, but not to the Government as a whole, because SSA's asset is offset by a liability of the General Fund. When disbursements are made, Treasury finances those disbursements in the same way it finances all other disbursements, which is to borrow from the public if there is a budget deficit (and to use current receipts if there is a budget surplus). Chart 4, Status of Fund Balances, presents SSA's Fund Balance with Treasury through the status of budgetary resources. The amounts in Chart 4, Status of Funds Unobligated (Available, Unavailable) and Obligated Balance Not Yet Disbursed represent budgetary authority for SSI and Other program general fund budgetary sources. OASI, DI, and LAE Trust Fund budgetary accounts are not used in Chart 4 since OASI and DI Trust Fund cash balances are held in investments until needed and do not directly correspond with the budgetary lines shown in the chart. Therefore, amounts in Chart 4 will not match corresponding activity on the Combined Statements of Budgetary Resources.

**Chart 4 - Status of Fund Balances as of September 30:
(Dollars in Millions)**

	2021	2020
Unobligated Balance		
Available	\$ 4,875	\$ 5,065
Unavailable	47	42
Obligated Balance Not Yet Disbursed	3,111	3,041
OASI, DI, and LAE	138	(195)
Non-Budgetary Fund Balance with Treasury	40	39
Total Status of Fund Balances	\$ 8,211	\$ 7,992

The Unobligated Balance, Available in Chart 4 contains Category C funding which is an amount apportioned by OMB, for multi-year or no-year accounts, that is available for use in a future fiscal year. SSA Category C funding is \$255 and \$265 million as of September 30, 2021 and 2020. These funds are related to the SSI State Supplemental advances for the October 1st benefit payments, SSI Beneficiary Services, and SSI Research & Demonstration activity.

The fund balance reported in Chart 4 for the total OASI, DI, and LAE Trust Funds as of September 30, 2021 and 2020 can be positive or negative as the result of the policy to protect the OASI and DI Trust Fund investments by not liquidating the investments until the cash is needed. Transfers between the OASI and DI Trust Funds and Treasury are managed to favor the financial position of the OASI and DI Trust Funds. Therefore, investments held by the OASI and DI Trust Funds are liquidated only as needed by Treasury to cover benefit and administrative payments. To maintain consistency with the amounts reported by Treasury for OASI and DI, SSA does not reclassify a negative balance as a liability on the Consolidated Balance Sheets.

5. INVESTMENTS AND INTEREST RECEIVABLE

The cash receipts collected from the public for the OASI and DI Trust Funds are invested in interest-bearing securities backed by the full faith and credit of the Federal Government, generally U.S. par-value Treasury special securities. The Secretary of the Treasury directly issues Treasury special securities to the OASI and DI Trust Funds. The securities are non-negotiable and non-transferable in the secondary market. Par-value Treasury special securities are issued with a stated rate of interest applied to its par amount and are purchased and redeemed at par plus accrued interest at or before maturity. Therefore, there are no premiums or discounts associated with the redemption of these securities.

SSA displays investments in Special-Issue U.S. Treasury Securities, and the corresponding interest receivable, reported as Intragovernmental Investments on the Consolidated Balance Sheets, in Chart 5.

**Chart 5 - Investments as of September 30:
(Dollars in Millions)**

	2021			2020		
	Special Issue Securities	Interest Receivable	Total Investments	Special Issue Securities	Interest Receivable	Total Investments
OASI	\$ 2,755,785	\$ 16,180	\$ 2,771,965	\$ 2,811,213	\$ 17,744	\$ 2,828,957
DI	98,032	628	98,660	97,210	665	97,875
Total	\$ 2,853,817	\$ 16,808	\$ 2,870,625	\$ 2,908,423	\$ 18,409	\$ 2,926,832

The interest rates on these investments range from 0.750 to 5.000 percent. The accrued interest is paid on June 30, December 31, and at maturity or redemption. Investments held for the OASI and DI Trust Funds mature at various dates ranging from the year 2022 to the year 2036.

Treasury special securities are an asset to the OASI and DI Trust Funds and a liability to the Treasury. Because the OASI and DI Trust Funds and the Treasury are both part of the Government, these assets and liabilities offset each other for consolidation purposes in the U.S. government-wide financial statements. For this reason, they do not represent a net asset or a net liability in the U.S. government-wide financial statements.

The Treasury does not set aside financial assets to cover its liabilities associated with the OASI and DI Trust Funds. Treasury uses the cash received from the OASI and DI Trust Funds for investment in these securities for general Government purposes. Treasury special securities provide the OASI and DI Trust Funds with authority to draw upon the Treasury to make future benefit payments or other expenditures. When the OASI and DI Trust Funds require redemption of these securities to make expenditures, the Government finances those expenditures out of accumulated cash balances by raising taxes or other receipts, by borrowing from the public or repaying less debt, or by curtailing other expenditures. This is the same way that the Government finances all other expenditures.

6. ACCOUNTS RECEIVABLE, NET

INTRAGOVERNMENTAL

Intragovernmental Accounts Receivable, Net, reported on the Consolidated Balance Sheets in the amounts of \$1,365 and \$898 million as of September 30, 2021 and 2020 primarily represent amounts to be paid from the HI/SMI Trust Funds to the LAE Appropriation. SSA reduced the gross accounts receivable by \$3,219 and \$3,534 million as of September 30, 2021 and 2020 as an intra-agency elimination. This elimination is primarily to offset SSA's LAE receivable to be paid from the appropriate funds with corresponding payables set up for anticipated LAE disbursements. Intragovernmental Accounts Receivable, Net also includes amounts related to the Section 4003 of the CARES Act, Emergency Relief and Taxpayer Protection, which allows Treasury to make loans, loan guarantees, and other investments to eligible businesses, States, and municipalities impacted by the COVID-19 pandemic. This legislation designates the OASI Trust Fund as the recipient of any interest and other proceeds

associated with the loans, loan guarantees, and other investments after repayments of any amounts provided are made to Treasury. We have recorded \$483 million in Intragovernmental Accounts Receivable, Net for this activity as of September 30, 2021 based on Treasury’s estimate of their liability owed to OASI.

SSA does not apply an allowance for doubtful accounts to determine the net value of Intragovernmental Accounts Receivable. According to SFFAS No. 1, *Accounting for Selected Assets and Liabilities*, an allowance for estimated uncollectible amounts should be recognized to reduce the gross amount of receivables to its net realizable value; however, no potential losses have been assessed on intragovernmental receivables based on individual account and program analysis.

WITH THE PUBLIC

Accounts Receivable, Net, reported on the Consolidated Balance Sheets is shown by SSA major program in Chart 6a. Amounts in the OASI and DI programs consist mainly of monies due to SSA from individuals who received benefits in excess of their entitlement. The amount of SSI Accounts Receivable represents Federal and State activity. The SSI Federal and State portions consist of overpayments due from SSI recipients who are no longer eligible to receive benefit payments or received benefits in excess of their eligibility. Additionally, the SSI State portion consists of amounts due from the States to cover underpayments due to the SSI recipients. Refer to Note 3, Non-Entity Assets, for a discussion of the SSI Federal and State overpayments and underpayments. Section 215 of the *Economic Growth, Regulatory Relief, and Consumer Protection Act* (Banking Bill) requires SSA to provide a “permitted entity” a confirmation (or non-confirmation) of fraud protection data (i.e., Social Security number verification) based on the number holder’s written consent, including by electronic signature. The Banking Bill requires SSA to fully recover all costs from the users of the verification process by way of advances, reimbursements, user fees, or other recoveries as determined by the Commissioner. To comply with the Banking Bill, SSA used its LAE account to cover non-mission costs with the expectation that these costs will be fully recovered from the users of the verification process as required by law. To account for these costs SSA has recorded a non-budgetary accounts receivable of \$37 and \$30 million as of September 30, 2021 and 2020, which is included in the LAE Gross and Net Receivable amounts in Chart 6a. Since the agency expects to fully recover these costs, SSA has not applied an allowance for doubtful accounts against this accounts receivable. Our LAE receivable also contains \$20 and \$17 million as of September 30, 2021 and 2020 that is due from employees for deferred payroll taxes based on the President’s August 8, 2020 *Memorandum on Deferring Payroll Tax Obligations in Light of the Ongoing COVID-19 Disaster*.

**Chart 6a - Accounts Receivable with the Public by Major Program as of September 30:
(Dollars in Millions)**

	2021			2020		
	Gross Receivable	Allowance for Doubtful Accounts	Net Receivable	Gross Receivable	Allowance for Doubtful Accounts	Net Receivable
OASI	\$ 3,046	\$ (969)	\$ 2,077	\$ 3,100	\$ (962)	\$ 2,138
DI	5,963	(2,831)	3,132	6,395	(3,076)	3,319

**Intra-Agency Eliminations

Chart 6a shows that in FY 2021 and FY 2020, SSA reduced gross accounts receivable by \$491 and \$446 million as an intra-agency elimination. This intra-agency activity results primarily from the Windfall Offset and KZ Diary activity. Windfall Offset is the amount of SSI that would not have been paid if retroactive OASI and DI benefits had been paid timely to eligible beneficiaries. The KZ Diary process identifies SSI recipients eligible for prior entitlement of OASI and DI benefits, and determines SSA's liability for retroactive benefits owed to beneficiaries. For each activity, SSA recognizes a receivable in the SSI program with offsetting payables for both the OASI and DI programs.

During FY 2020, as a result of the COVID-19 pandemic, SSA temporarily deferred certain workloads, such as processing certain programmatic overpayments, resulting in lower new debt than in previous years. In FY 2021, the agency resumed the majority of these suspended activities resulting in an increase in new debt established. However, this increase in gross receivables is offset by increased write-offs.

During FY 2020, we re-evaluated our program debt portfolio, specifically delinquent and uncollectible debt that we were pursuing. We found that we were pursuing debt that was largely uncollectible, thereby inefficiently using our processing centers' limited resources. In FY 2020, we targeted and wrote-off a portion of our OASI and DI debt that we determined to be uncollectible to start our new debt write-off process, which contributed to the increase in write-offs compared to previous years. In FY 2021, we continued to evaluate our delinquent debt and have continued this write-off process for our SSI program debt, as well as additional OASI and DI debt. As part of this new debt write-off initiative, we have developed an automated process to evaluate debt going forward for potential write-offs. By writing-off collection activity on uncollectible debt, we are better reflecting current receivables on our financial statements as well as reducing the number of actions from the processing center pending backlog. Please note that any debt terminated is still eligible for collection in the future.

As part of our Allowance for Doubtful Accounts methodology, SSA allows all delinquent debt two years and older as we estimate this debt is uncollectible based on the age of the debt. For our remaining debt, SSA annually recalculates a ratio of allowance for doubtful accounts on programmatic accounts receivable with the public. We apply a moving five-year average of uncollectible receivable ratios, based on comparing each program's collections to new debt while considering turnover rates, against outstanding receivables that are not delinquent two years and older. We add this calculated uncollectible ratio-based value to the allowed delinquent debt two years and older value to compute the total amount of allowance for doubtful accounts.

2049 SYSTEM LIMITATION

A Title II system design limitation prevents us from capturing and tracking long-term withholding agreements for debts owed by the public scheduled for collection beyond the year 2049. Current policy allows for repayment periods based on the ability of beneficiaries to repay on a periodic basis. This allows for the establishment of payment terms, which may exceed the expected life span of the beneficiary.

When the projected collection extends beyond December 31, 2049, we perform a manual action to establish withholding through December 31, 2049, causing the system to delete the remaining debts owed by the public balance from the record. Current policy requires us to post an overpayment diary to control for follow-up of the remaining balance in December 2049. However, because our records do not reflect the post 2049 balance, subsequent correspondence to the debtor only presents the pre-2049 balance of the debts owed by the public established for withholding. The only control mechanism in place for the post 2049 balance is the manual establishment of a diary.

We do not include these balances in the Chart 6a gross receivable amounts as they are not material to the consolidated financial statements. We estimate that the total gross value of the post year 2049 amount not captured in our gross receivables, is approximately \$731 and \$718 million as of September 30, 2021 and 2020.

7. GENERAL PROPERTY, PLANT, AND EQUIPMENT, NET

General Property, Plant, and Equipment, Net, as reported on the Consolidated Balance Sheets, is reflected by major class in Chart 7a.

Chart 7a - General Property, Plant, and Equipment as of September 30:
(Dollars in Millions)

Major Classes:	2021			2020		
	Cost	Accumulated Depreciation	Net Book Value	Cost	Accumulated Depreciation	Net Book Value
Buildings and Other Structures	\$ 47	\$ (22)	\$ 25	\$ 48	\$ (21)	\$ 27

(Dollars in Millions)

	2021	2020
Balance beginning of year	\$ 3,765	\$ 3,438
Capitalized acquisitions	1,280	939
Depreciation expense	(673)	(612)
Balance at end of year	\$ 4,372	\$ 3,765

8. ADVANCES AND PREPAYMENTS

INTRAGOVERNMENTAL ADVANCES AND PREPAYMENTS

Intragovernmental Advances and Prepayments amounts include advances provided to Federal agencies for goods and services that will be furnished to SSA. Intragovernmental Advances and Prepayments are \$108 and \$75 million as of September 30, 2021 and 2020.

9. LIABILITIES

Liabilities of Federal agencies are classified as liabilities Covered by, Not Covered by, or Not Requiring budgetary resources and are recognized when incurred. Charts 9a and 9b disclose SSA's liabilities Covered by budgetary resources, Not Covered by budgetary resources, and Not Requiring budgetary resources. Liabilities Covered by budgetary resources use available budget authority when SSA incurs the liabilities. Liabilities Not Covered by budgetary resources do not use available budget authority in the current period; these liabilities will be funded in

future periods. Liabilities Not Requiring budgetary resources represent cash or receivables due to the General Fund and States, which do not require budgetary authority.

**Chart 9a - Liabilities as of September 30:
(Dollars in Millions)**

Total Liabilities	\$ 112,212	\$ 2,837	\$ 4,440	\$ 119,489

INTRAGOVERNMENTAL LIABILITIES

ACCOUNTS PAYABLE

Intragovernmental Accounts Payable Covered by budgetary resources primarily includes an accrued liability for amounts due to the Railroad Retirement Board for the annual interchange from the OASI and DI Trust Funds. This annual interchange is required to place the OASI and DI Trust Funds in the same position they would have been if SSA had covered railroad employment. The *Railroad Retirement Act of 1974* requires the transfer, including

interest accrued from the end of the preceding fiscal year, to be made in June. SSA's Railroad Retirement Interchange liability is \$5,285 and \$5,396 as of September 30, 2021 and 2020

ADVANCES FROM OTHERS AND DEFERRED REVENUE

Intragovernmental Advances from Others and Deferred Revenue Covered by budgetary resources include advances from the Department of Homeland Security for services to be performed by SSA.

OTHER LIABILITIES

Intragovernmental Other Liabilities include amounts Covered by budgetary resources for payroll taxes, excluding deferred payroll taxes. Intragovernmental Other Liabilities Covered, shown in Charts 9a and 9b, are current liabilities. Intragovernmental Other Liabilities, Not Covered by budgetary resources includes amounts for deferred payroll taxes based on the President's August 8, 2020 *Memorandum on Deferring Payroll Tax Obligations in Light of the Ongoing COVID-19 Disaster* due to Treasury. SSA's payroll tax deferral liability is \$18 and \$17 million as of September 30, 2021 and 2020. Intragovernmental Other Liabilities Not Covered by budgetary resources also includes amounts for *Federal Employees' Compensation Act (FECA)*, administered by the Department of Labor (DOL). FECA provides income and medical cost protection to covered Federal civilian employees injured on the job, employees who have incurred a work-related injury or occupational disease, and beneficiaries of employees whose death is attributable to a job-related injury or occupational disease. For payment purposes, claims incurred for benefits for SSA employees under FECA are divided into current and non-current portions. The current portion represents SSA's accrued liability due to the DOL's FECA Special Benefits Fund for payments made on SSA's behalf. The funding for the liability will be made from a future appropriation. SSA's current portions of FECA liability are \$49 and \$51 million as of September 30, 2021 and 2020. Intragovernmental Other Liabilities Not Requiring budgetary resources includes amounts due to Treasury's General Fund, which primarily consists of a payable for SSI Federal benefit overpayments. SSA records a payable equal to the SSI Federal benefit overpayments receivable when the agency identifies overpayments. Refer to Note 3, Non-Entity Assets, for additional information on the SSI receivables established for the repayment of SSI benefit overpayments. Intragovernmental Other Liabilities Not Requiring budgetary resources are current and non-current depending on when the benefit overpayment collections are received. Chart 9c displays a breakout of Intragovernmental Other Liabilities as of September 30, 2021 and 2020.

**Chart 9c - Intragovernmental Other Liabilities as of September 30:
(Dollars in Millions)**

	2021	2020
Employer Contributions and Payroll Taxes Payable	\$ 95	\$ 85
Unemployment Compensation Liability	1	1
Unfunded FECA Liability	49	51
Liability to the General Fund for Non-Entity Assets	3,649	4,216
Other Liabilities w/o related budgetary obligations	18	17
Total Other Liabilities	\$ 3,812	\$ 4,370

LIABILITIES WITH THE PUBLIC

ACCOUNTS PAYABLE

Accounts Payable Not Requiring budgetary resources consists of SSI State Supplemental overpayments due to States. States are entitled to any overpayment that SSA expects to collect because the States fund the actual payments made to the beneficiaries. Accounts Payable Not Covered by budgetary resources consist of SSI State Supplemental underpayments due to the SSI recipients. These amounts are set up as an accounts payable until payment is made.

FEDERAL EMPLOYEE AND VETERAN BENEFITS

Federal Employee and Veteran Benefits Not Covered by budgetary resources includes amounts for leave earned but not taken and the non-current portion of FECA, which is an actuarial liability. The non-current portion of \$274 and \$281 million as of September 30, 2021 and 2020 represents the expected liability from FECA claims for the next 23-year period. DOL calculated this actuarial liability using historical payment data to project future costs.

BENEFITS DUE AND PAYABLE

Benefits Due and Payable are amounts owed to program recipients that have not yet been paid as of the balance sheet date. Chart 9d shows the amounts for SSA's major programs as of September 30, 2021 and 2020. These amounts include an estimate for unadjudicated cases that will be payable in the future. Except for the SSI program, budgetary resources cover the unadjudicated cases.

Chart 9d - Benefits Due and Payable as of September 30:
(Dollars in Millions)

	2021	2020
OASI	\$ 87,397	\$ 83,717
DI	20,472	21,432
SSI	3,472	3,403
Subtotal	111,341	108,552
Less: Intra-agency eliminations	(491)	(446)
Total Benefits Due and Payable	\$ 110,850	\$ 108,106

Chart 9d also shows that as of FY 2021 and FY 2020, SSA reduced gross Benefits Due and Payable by \$491 and \$446 million as an intra-agency elimination. This intra-agency activity results primarily from the Windfall Offset and KZ Diary activity. Refer to Note 6, Accounts Receivable, Net.

ADVANCES FROM OTHERS AND DEFERRED REVENUE

SSA's Advances from Others and Deferred Revenue Covered by budgetary resources is primarily comprised of SSI State Supplemental amounts collected in advance of future SSI benefit payments made by SSA on the State's behalf.

OTHER LIABILITIES

SSA's Other Liabilities consist of liabilities Covered by and Not Requiring budgetary resources. Other Liabilities Covered by budgetary resources is primarily comprised of accrued payroll. Other liabilities Not Requiring budgetary resources consists of unapplied deposit funds. Other Liabilities are current in nature with the exception of \$18 million of Not Requiring unapplied deposit funds as of September 30, 2021 and 2020. Chart 9e displays a breakout of Other Liabilities with the Public as of September 30, 2021 and 2020.

Chart 9e - Other Liabilities as of September 30:
(Dollars in Millions)

	2021	2020
Accrued Funded Payroll and Leave	\$ 288	\$ 269
Other Liabilities w/o related budgetary obligations	38	47
Total Other Liabilities	\$ 326	\$ 316

FEDERAL LEASES

SSA has Occupancy Agreements (OA) with GSA for each space that we occupy. The OA is a complete, concise statement of the business terms governing the tenancy relationship between SSA and GSA. The OA is not a lease, but rather a formal agreement between the signing parties. For accounting purposes, these OAs are treated as lease

activity. GSA charges rental rates for space that approximates commercial rental rates for similar properties. The terms of the OAs vary according to whether the Federal Government directly owns the underlying assets or if GSA rents the underlying asset from third party commercial property owners, though each OA may have slightly different terms. SSA executes cancellable and non-cancellable OAs with GSA. Periods of occupancy on OAs vary, and can generally be cancelled with four months' notice following the first year of occupancy. OAs must be coterminous with the underlying lease term. For non-cancellable OAs, SSA is financially responsible for rental payments on vacated space until the expiration of the OA, the termination of the OA permitted under the lease terms, or the occupancy by a replacement tenant covers the total rent obligation. OAs do not include renewal options that may be in the lease, as GSA makes a determination as to whether such options are fair and reasonable relative to the market when the option matures. Chart 9f shows the future estimated rental payments required under OAs that have initial or remaining non-cancellable terms in excess of one year. SSA does not include the amounts reported in our financial statements. SSA expenses OAs as incurred, and does not record liabilities for future years' costs.

**Chart 9f- Future Operating Lease/Occupancy Agreement Commitments as of September 30:
(Dollars in Millions)**

Fiscal Year	GSA OAs	
2022	\$	138
2023		136
2024		123
2025		108
2026		103
2027 and Thereafter (In total)*		434
Total Future Lease Payments	\$	1,042

Note:

*OAs go through the year 2036.

CONTINGENT LIABILITIES

SSA's Contingent Liabilities include pending claims with estimated potential losses that are deemed reasonably possible of having an adverse outcome. According to SFFAS 5, *Accounting for Liabilities of the Federal Government*, for legal contingencies deemed reasonably possible of having an adverse outcome, no liability is recognized; however, disclosure of the contingency is required. See disclosures of Contingent Liabilities described below:

- Various cases challenge the constitutionality of excluding residents of Puerto Rico and Guam from certain Federal assistance programs. The amount of the potential loss that could arise out of these cases may or may not be material, depending on the scope of any adverse outcome. The relative recency of two of these cases, which are on hold pending a separate Supreme Court decision, prevents us from defining the reasonable scope of any adverse outcome, including certain aspects of eligibility that affect the materiality, and thus an estimate cannot be developed at this time.
- Cases contest the application of the Windfall Elimination Provision to reduce their Social Security benefits due to the receipt of foreign government retirement benefits from 25 countries with which the United States has entered into totalization agreements. The amount of potential loss arising out of these cases is estimated to be approximately \$2,197 million and \$17 million for the OASI and DI Trust Funds, respectively. There is no contingent liability for the SSI program.
- Case contests SSA's method of reducing benefits under the family maximum provision for auxiliary children of retired workers whose benefits are reduced due to becoming entitled to such benefits before attaining Normal Retirement Age. Due to the relative recency of this case, we are unable to determine the estimated amount of potential loss at this time.

- Case contests the interim final rule related to SSA’s implementation of a streamlined waiver process for certain overpayment debts that accrued during a defined COVID-19 pandemic period. The relative recency of this case prevents us from defining a reasonable scope of any adverse outcome and thus an estimate cannot be developed at this time.

10. FUNDS FROM DEDICATED COLLECTIONS

The OASI and DI Trust Funds, Taxation on Social Security Benefits, and SSI State Administrative Fees are classified as funds from dedicated collections. These funds obtain revenues primarily through non-Federal receipts, such as Social Security payroll taxes and, to a lesser extent, offsetting collections.

OASI AND DI TRUST FUNDS

The OASI Trust Fund provides retirement and survivors benefits to qualified workers and their families. The DI Trust Fund provides disability benefits to individuals who cannot work because they have a medical condition expected to last one year or result in death.

Payroll and self-employment taxes primarily fund the OASI and DI Trust Funds. Interest earnings on Treasury securities, Federal agencies’ payments for the Social Security benefits earned by military and Federal civilian employees, and Treasury payments for a portion of income taxes paid on Social Security benefits provide additional income to the OASI and DI Trust Funds. The law establishing the OASI and DI Trust Funds is set forth in 42 U.S.C. § 401. Refer to Note 13, Tax Revenues, for a discussion on employment taxes credited to the OASI and DI Trust Funds, and Note 5, Investments and Interest Receivable, for a discussion on interest.

Funds not withdrawn for current expenses (benefits, the financial interchange with the Railroad Retirement program, and administrative expenses) are invested in interest-bearing Federal securities, as required by law. See Note 5, Investments and Interest Receivable, for a discussion on Treasury securities.

TAXATION ON SOCIAL SECURITY BENEFITS

Taxation on Social Security Benefits is also classified as funds from dedicated collections. The *Social Security Amendments of 1983* (Public Law 98-21) provides that the OASI and DI Trust Funds receive income related to Federal income taxation of benefits. The taxes are collected as Federal income taxes, and a subsequent payment is then made to the OASI and DI Trust Funds from the General Fund of the Treasury. These collections are warranted from the General Fund and transferred to the OASI and DI Trust Funds via an intragovernmental transfer. These transfers are to be reserved for specific purposes in the future. Thus, Taxation on Social Security Benefits is considered dedicated collections.

SSI STATE ADMINISTRATIVE FEES

Administrative Fees collected from States are also classified as funds from dedicated collections. Section 42 U.S.C. 1616 authorizes the Commissioner of Social Security to assess each State an administrative fee in an amount equal to the number of Supplemental payments made by SSA on behalf of the State for any month in a fiscal year, multiplied by the applicable rate for the fiscal year. See Note 12, Exchange Revenues, for a discussion of SSI State Administrative Fees.

See Charts 10a and 10b for balances of funds from dedicated collections as reported in the Consolidated Financial Statements for the years ended September 30, 2021 and 2020. The Other Dedicated Funds column in Charts 10a and 10b consist of Taxation on Social Security Benefits and SSI State Administrative Fees activity.

The above Chart 10a for FY 2021 includes eliminations between SSA's funds from dedicated collections, which primarily represent eliminations for activity between the OASI and DI Trust Funds. However, \$2,244 million of receivables and liabilities in the funds from dedicated collections for the year ended September 30, 2021 must be eliminated against LAE (Accounts Payable, Federal), SSI (Benefits Due and Payable and Accounts Receivables,

Non-Federal), and PTF, excluding Taxation on Benefits (Accounts Receivable, Federal), which are not classified as funds from dedicated collections. Therefore, due to the separate presentation of funds from dedicated collections only in this note, SSA does not include eliminations between funds from dedicated collections and LAE, SSI, and PTF, excluding Taxation on Benefits in Chart 10a.

Chart 10b for FY 2020 includes eliminations between SSA's funds from dedicated collections, which primarily represent eliminations for activity between the OASI and DI Trust Funds. However, \$2,434 million of receivables and liabilities in the funds from dedicated collections for the year ended September 30, 2020 must be eliminated against LAE (Accounts Payable, Federal), SSI (Benefits Due and Payable and Accounts Receivables, Non-Federal), and PTF, excluding Taxation on Benefits (Accounts Receivable, Federal), which are not classified as funds from dedicated collections. Therefore, due to the separate presentation of funds from dedicated collections only in this note, SSA does not include eliminations between funds from dedicated collections and LAE, SSI, and PTF, excluding Taxation on Benefits in Chart 10b.

11. OPERATING EXPENSES

CLASSIFICATION OF OPERATING EXPENSES BY MAJOR PROGRAM

Charts 11a and 11b display SSA's operating expenses for each major program. LAE SSA operating expenses recorded in Other primarily represent the HI/SMI Trust Funds' shares of SSA's operating expenses, including the Medicare Prescription Drug Program. LAE operating expenses related to the *American Recovery and Reinvestment Act of 2009* (ARRA) are recorded in the Other program, and primarily represent expenses associated with the National Support Center. LAE operating expenses related to the CARES Act are recorded in the Other program, and primarily represent expenses to prevent, prepare for, and respond to the COVID-19 pandemic, and to assist Treasury with economic impact payments. OASI and DI Trust Fund Operations include expenses of Treasury to assist in managing the OASI and DI Trust Funds. Vocational Rehabilitation includes expenditures of State agencies for vocational rehabilitation of OASI, DI, and SSI beneficiaries.

**Chart 11a - SSA's Operating Expenses by Major Program as of September 30:
(Dollars in Millions)**

	2021							Total
	LAE				OASI and DI Trust Fund Operations	Vocational Rehabilitation & Other		
	SSA	OIG	CARES Act	ARRA				
OASI	\$ 3,372	\$ 46	\$ 0	\$ 0	\$ 524	\$ 16	\$ 3,958	
DI	2,534	34	0	0	94	184	2,846	
SSI	4,490	0	0	0	0	214	4,704	
Other	2,747	32	55	7	0	0	2,841	
Total	\$ 13,143	\$ 112	\$ 55	\$ 7	\$ 618	\$ 414	\$ 14,349	

**Chart 11a - SSA's Operating Expenses by Major Program as of September 30:
(Dollars in Millions)**

	2020							Total
	LAE				OASI and DI Trust Fund Operations	Vocational Rehabilitation & Other		
	SSA	OIG	CARES Act	ARRA				
OASI	\$ 3,158	\$ 46	\$ 0	\$ 0	\$ 512	\$ 16	\$ 3,732	
DI	2,516	36	0	0	93	189	2,834	
SSI	4,507	0	0	0	0	238	4,745	
Other	2,556	33	287	8	0	0	2,884	
Total	\$ 12,737	\$ 115	\$ 287	\$ 8	\$ 605	\$ 443	\$ 14,195	

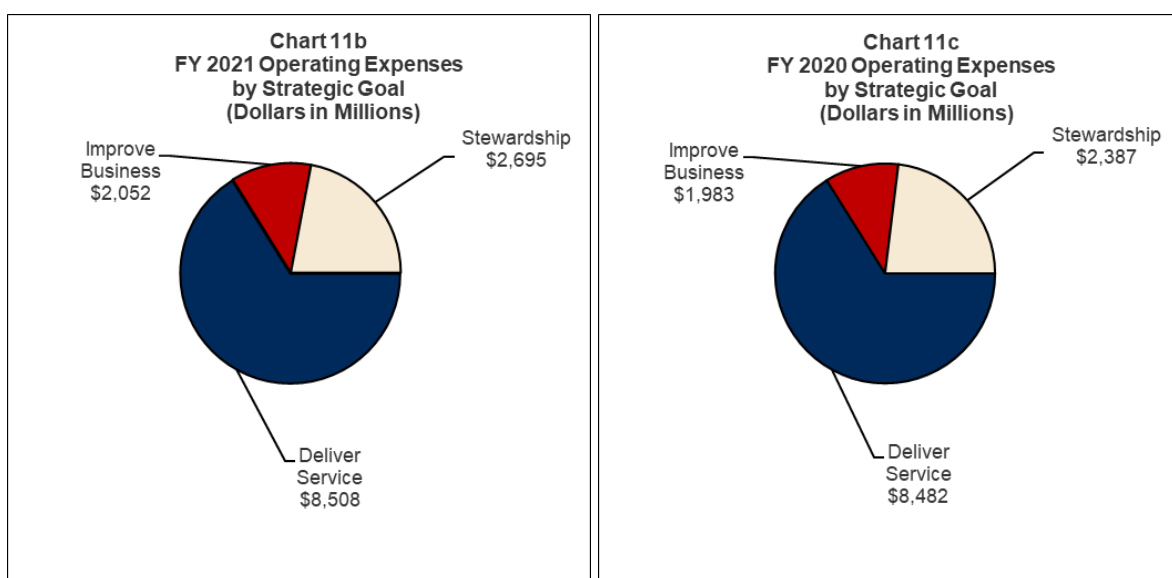

CLASSIFICATION OF OPERATING EXPENSES BY STRATEGIC GOAL

SSA's *Annual Performance Plan* (APP) sets forth expected levels of performance the agency is committed to achieving, and includes proposed levels of performance for future fiscal years. Our APP is characterized by broad-based Strategic Goals that the entire agency supports. The three Strategic Goals are:

- Deliver Services Effectively (Deliver Service);
- Improve the Way We Do Business (Improve Business); and
- Ensure Stewardship (Stewardship).

Charts 11b and 11c exhibit the distribution of FY 2021 and FY 2020 SSA and OIG LAE operating expenses to the three APP Strategic Goals, which agree to the agency's LAE budget appropriation. The operating expenses are allocated to each goal using percentages developed using data from SSA's CAS. The percentages are calculated using agency workload data.

For Charts 11b and 11c, we subtracted LAE ARRA and CARES Act expenses from total SSA LAE operating expenses before distributing the operating expenses to the agency's APP Strategic Goals. We do not include OASI and DI Trust Fund Operations and Vocational Rehabilitation expenses (see Chart 11a) in LAE by Strategic Goal as these amounts are disbursed from the OASI and DI Trust Funds and are not directly linked to the budget authority.

12. EXCHANGE REVENUES

SSA recognizes revenue from exchange transactions when goods and services are provided. The goods and services provided are priced so that charges do not exceed the agency's cost. Total exchange revenue is \$312 and \$295 million for the years ended September 30, 2021 and 2020. SSA's exchange revenue primarily consists of fees collected to administer SSI State Supplementation. The fees charged to the States are \$12.49 and \$12.41, per payment, for the years ended September 30, 2021 and 2020. SSA has agreements with 20 States and the District of Columbia to administer some or all of the States' supplement to Federal SSI benefits. Additional fees are collected for handling OASI and DI Trust Fund and SSI attorney fees. Other exchange revenue consists of reimbursement for performing non-mission work for Federal and non-Federal entities. Chart 12 discloses SSA's exchange revenue by activity.

**Chart 12 - Exchange Revenue as of September 30:
(Dollars in Millions)**

	2021	2020
SSI State Supplementation Fees	\$ 211	\$ 217
SSI Attorney Fees	7	8
DI Attorney Fees	20	23
OASI Attorney Fees	1	1
Other Exchange Revenue	73	46
Total Exchange Revenue	\$ 312	\$ 295

SSI administrative fees are split between fees that SSA can use and fees that are entitled to Treasury's General Fund. The General Fund's portion of these administrative fees are \$91 and \$95 million for the years ended September 30, 2021 and 2020. Of these amounts, \$84 and \$87 million were collected to administer SSI State Supplementation for the years ended September 30, 2021 and 2020. SSA maintains the remainder of the SSI administrative fees, which meet the criteria of a fund from dedicated collections, in the amounts of \$127 and \$130 million for the years ended September 30, 2021 and 2020, to defray expenses in carrying out the SSI program.

13. TAX REVENUES

Treasury estimates monthly employment tax revenues based on SSA's quarterly estimate of taxable earnings. Treasury uses these estimates to credit the OASI and DI Trust Funds with tax receipts received during the month. Treasury makes adjustments to the amounts previously credited to the OASI and DI Trust Funds based on actual wage data SSA certified quarterly.

As required by current law, the OASI and DI Trust Funds are due the total amount of employment taxes payable regardless of whether they have been collected. These estimated amounts are subject to adjustments for wages that were previously unreported, employers misunderstanding the wage reporting instructions, businesses terminating operations during the year, or errors made and corrected with either the Internal Revenue Service (IRS) or SSA. Revenues to the OASI and DI Trust Funds are reduced for excess employment taxes, which are refunded by offset against income taxes.

During FY 2020, due to the impact of the COVID-19 pandemic, the IRS did not process Single and Multiple Employer Refunds. The IRS usually processes these refunds of employment taxes paid in September. The refunds are the result of employers reporting wages in excess of the applicable taxable maximum (Single Employer Refunds), or employees whose combined wages from multiple employers exceeded the applicable taxable maximum (Multiple Employer Refunds). These refunds are deducted from employment tax revenues reported in Chart 13. The FY 2020 refunds were processed in FY 2021 totaling \$75 and \$13 million for Single Employer Refunds, and \$3,265 and \$552 million for Multiple Employer Refunds, for OASI and DI respectively.

Chart 13 displays SSA's Tax Revenue, as reported on the Consolidated Statements of Changes in Net Position, by major program.

**Chart 13 - Tax Revenue as of September 30:
(Dollars in Millions)**

	2021	2020
OASI	\$ 831,124	\$ 841,664
DI	141,195	142,898
Total Tax Revenue	\$ 972,319	\$ 984,562

14. IMPUTED FINANCING

SSA recognizes the full cost of goods and services that we receive from other entities on our Consolidated Statements of Net Cost. In some instances, goods or services provided by one Federal entity to another may not be fully reimbursed by the receiving entity. The unreimbursed portion of these costs is considered an imputed cost, and must be recognized on the receiving entity's Statement of Net Cost. The funding for these imputed costs is recognized as an imputed financing source on the receiving entity's Statement of Changes in Net Position. SSA has activities with OPM and Treasury that require imputed costs and financing sources to be recognized. While the imputed financing sources are shown on the face of the Consolidated Statements of Changes in Net Position, the imputed costs are included in the operating expense amounts reported on the Consolidated Statements of Net Cost.

OPM administers three earned benefit programs for civilian Federal employees: (1) the Retirement Program, comprised of the CSRS and the FERS; (2) the Federal Employees Health Benefits Program (FEHBP); and (3) the Federal Employee Group Life Insurance Program (FEGLI). The total service costs for SSA employee pensions, life, and health insurance are financed by contributions of SSA, participating employees, and OPM. The Consolidated Statements of Net Cost recognize post-employment benefit expenses of \$1,428 and \$1,318 million for the years ended September 30, 2021 and 2020, as a portion of operating expenses. The expense represents the current and estimated future costs of SSA and OPM for SSA employee pensions, life, and health insurance. SSA is responsible for a portion of the costs of each benefit program during the fiscal year, while the remaining costs are covered by OPM. SSA recognizes these costs on our financial statements as an imputed cost, with a corresponding imputed financing source.

Treasury, on SSA's behalf, processes the payments for SSI benefits. While the majority of the administrative costs associated with processing these payments are recorded as imputed costs with an associated imputed financing source, SSA is responsible for the costs related to postage. In addition, when funds are not legally available to pay monetary awards from SSA's own appropriations, Treasury issues payments from the Judgment Fund on behalf of SSA for court judgments and Department of Justice compromise settlements of actual or imminent lawsuits against SSA. These costs are also recorded as imputed costs with a corresponding imputed financing source.

Chart 14 discloses SSA's imputed financing sources by activity.

**Chart 14 - Imputed Financing Sources as of September 30:
(Dollars in Millions)**

	2021	2020
Employee Benefits (OPM)		
CSRS*	\$ 58	\$ 45
FERS	3	0
FEHBP	514	494
FEGLI	1	1
Total Employee Benefits	576	540
SSI Benefit Payments (Treasury)	17	17
Judgment Fund (Treasury)	2	1
Total Imputed Financing Sources	\$ 595	\$ 558

Note:

*The FY 2020 CSRS amounts are offset by \$19 million of excess FY 2020 FERS employer contributions over program service cost.

15. BUDGETARY RESOURCES

APPROPRIATIONS RECEIVED

The Combined Statements of Budgetary Resources discloses Appropriations Received of \$1,232,394 and \$1,200,535 million for the years ended September 30, 2021 and 2020. Appropriations Received on the Consolidated Statements of Changes in Net Position are \$94,946 and \$101,390 million for the same periods. The differences of \$1,137,448 and \$1,099,145 million primarily represent appropriated OASI and DI Trust Fund receipts. The Consolidated Statements of Changes in Net Position reflect new appropriations received during the year; however, those amounts do not include dedicated receipts in the OASI and DI Trust Funds.

Appropriations Received for PTF are recorded based on warrants received from the General Fund and presented as Other in the financial statements. These amounts are transferred to the Bureau of Fiscal Service where they are also recorded as Appropriations Received in the OASI and DI Trust Funds. Because OASI and DI Trust Fund activity is combined with Other on SSA's Combined Statements of Budgetary Resources, Appropriations Received for PTF are duplicated. This is in compliance with OMB's Circular No. A-136 to have the Combined Statements of Budgetary Resources in agreement with the required SF-133. These amounts are also included on the Consolidated Statements of Changes in Net Position for Other in Appropriations Received.

PERMANENT INDEFINITE APPROPRIATION

SSA has three Permanent Indefinite Appropriations: OASI and DI Trust Funds and Title VIII. The OASI Trust Fund provides retirement and survivors benefits to qualified workers and their families. The DI Trust Fund provides disability benefits to individuals who cannot work because they have a medical condition expected to last one year or result in death. The authority remains available as long as there are qualified beneficiaries.

The Title VIII Program was established as part of Public Law 106-169, *Foster Care Independence Act of 1999*. It provides special benefits to World War II Philippine veterans receiving SSI, who wanted to spend their remaining years outside the U.S. Prior to the passage of Public Law 106-169, the veterans' SSI benefits would terminate the month after leaving the U.S. Under the new law, these veterans will receive 75 percent of their benefits. The authority remains available as long as there are qualified recipients.

LEGAL ARRANGEMENTS AFFECTING USE OF UNOBLIGATED BALANCES

During the year, the OASI and DI Trust Funds collect receipts and incur obligations. The receipts are primarily made up of tax and interest revenues. As beneficiaries pass the various entitlement tests prescribed by the *Social Security Act*, benefit payments and other outlays are obligated against the OASI and DI Trust Funds. During a given year, when receipts collected exceed the amount needed to pay benefits and other valid obligations, the excess authority becomes precluded by law from being available for obligations, as of September 30. While this amount is precluded from obligation at the end of one fiscal year, the excess receipts remain assets of the OASI and DI Trust Funds and can become available in future periods as needed.

Chart 15a provides an overview of fiscal year budgetary receipt and obligation information for the OASI and DI Trust Funds. SSA compares the current year receipts to the current year obligations incurred to determine the excess or shortfall for a fiscal year.

**Chart 15a - OASI and DI Trust Fund Activities as of September 30:
(Dollars in Millions)**

	2021			2020		
	OASI	DI	Total	OASI	DI	Total
Receipts	\$ 935,997	\$ 144,413	\$ 1,080,410	\$ 955,597	\$ 147,489	\$ 1,103,086
Less: Obligations	994,976	142,452	1,137,428	953,157	145,861	1,099,018
Excess of Receipts Over Obligations	\$ (58,979)	\$ 1,961	\$ (57,018)	\$ 2,440	\$ 1,628	\$ 4,068

The overall Net Position of the OASI and DI Trust Funds included in Net Position, on the Consolidated Statements of Changes in Net Position, are \$2,680,486 and \$80,479 million for the year ended September 30, 2021, compared to \$2,741,021 and \$78,551 million for the year ended September 30, 2020.

UNDELIVERED ORDERS AT THE END OF THE PERIOD

Undelivered orders consist of orders of goods and services that SSA has not actually or constructively received. The total undelivered orders contain unpaid undelivered orders and advances, with unpaid orders making up the majority of the total. Chart 15b provides the undelivered orders amount by Federal, non-Federal, paid, and unpaid.

**Chart 15b - Undelivered Orders as of September 30:
(Dollars in Millions)**

	2021			2020		
	Federal	Non-Federal	Total	Federal	Non-Federal	Total
Unpaid Undelivered Orders	\$ 777	\$ 2,085	\$ 2,862	\$ 905	\$ 2,161	\$ 3,066
Paid Undelivered Orders	108	0	108	76	0	76
Total Undelivered Orders	\$ 885	\$ 2,085	\$ 2,970	\$ 981	\$ 2,161	\$ 3,142

EXPLANATION OF DIFFERENCES BETWEEN THE COMBINED STATEMENT OF BUDGETARY RESOURCES AND THE BUDGET OF THE U.S. GOVERNMENT

SSA conducted a reconciliation of budgetary resources, new obligations and upward adjustments, distributed offsetting receipts, and net outlays as presented in the Combined Statements of Budgetary Resources, to amounts included in the Budget of the U.S. Government for the year ended September 30, 2020. All differences shown in the chart below are recognized as accepted differences. Expired activity is not included in the Budget of the U.S. Government. Distributed offsetting receipts are not included in the net outlay calculation within the Budget of the U.S. Government.

Chart 15c presents a reconciliation of budgetary resources, new obligations and upward adjustments, distributed offsetting receipts, and outlays as presented in the Combined Statements of Budgetary Resources, to amounts included in the Budget of the U.S. Government for the year ended September 30, 2020.

**Chart 15c - Explanation of Differences Between Combined Statement of Budgetary Resources and the Budget of the U.S. Government for FY 2020:
(Dollars in Millions)**

	Budgetary Resources	New Obligations and Upward Adjustments	Distributed Offsetting Receipts	Net Outlays
Combined Statement of Budgetary Resources	\$ 1,222,093	\$ 1,216,026	\$ 42,589	\$ 1,153,915
Expired activity not in President's Budget	(422)	0	0	0
Offsetting Receipts activity not in President's Budget	0	0	0	42,589
Other	2	2	1	1
Budget of the U.S. Government	\$ 1,221,673	\$ 1,216,028	\$ 42,590	\$ 1,196,505

A reconciliation has not been conducted for the year ended September 30, 2021 since the actual budget data for FY 2021 will not be available until the President’s Budget is published. Once available, the actual budget data will be located on OMB’s Appendix website (www.whitehouse.gov/omb/appendix/).

16. RECONCILIATION OF NET COST TO NET OUTLAYS

Chart 16 presents a reconciliation between SSA’s budgetary and financial accounting. Budgetary accounting is used for planning and spending control purposes. The net outlays portion of budgetary accounting focuses on the receipt and use of cash. Financial accounting is intended to provide a picture of the government’s financial operations and financial position, so it presents information on an accrual basis. The accrual basis includes information about costs arising from the consumption of assets and the incurrence of liabilities. The net costs portion of financial accounting focuses on expenses and revenue.

The reconciliation below shows the relationship between SSA’s net outlays, presented on a budgetary cash basis and derived from the Combined Statements of Budgetary Resources, and net costs, presented on an accrual basis and derived from the Consolidated Statements of Net Cost, by identifying and explaining key items that affect one statement but not the other. Examples of this include transfers of authority, which affect net outlays but not net cost, or depreciation of capitalized assets that affect net cost, but not net outlays.

**Chart 16 - Reconciliation of Net Cost to Net Outlays for the Years Ended
September 30, 2021 and 2020
(Dollars in Millions)**

	2021			2020		
	Intra-governmental	With the Public	Total	Intra-governmental	With the Public	Total
Net Cost	\$ 4,652	\$ 1,189,520	\$ 1,194,172	\$ 4,392	\$ 1,153,346	\$ 1,157,738
Components of Net Cost That Are Not Part of Net Outlays:

Other assets	33	0	33	21	0	21
(Increase)/decrease in liabilities:						
Accounts payable	15	27	42	7	98	105
Benefits Due and Payable	0	(2,789)	(2,789)	0	(1,932)	(1,932)
Federal Employee and Veteran Benefits Payable	0	(11)	(11)	0	(62)	(62)
Other liabilities	561	(7)	554	1,780	(47)	1,733
Financing sources						
Imputed Costs	(594)	0	(594)	(558)	0	(558)
Total Components of Net Cost That Are Not Part of Net Outlays	\$ 497	\$ (4,273)	\$ (3,776)	\$ 1,246	\$ (6,631)	\$ (5,385)
Components of Net Outlays That Are Not Part of Net Cost:						
Acquisition of capital assets	0	1,280	1,280	155	784	939
Financing Sources						
Transfers out(in) without reimbursement	(484)	0	(484)	7	0	7
Expenditure Transfers Collected/Disbursed	1,940	0	1,940	2,515	0	2,515
Total Components of Net Outlays That Are Not Part of Net Cost	\$ 1,456	\$ 1,280	\$ 2,736	\$ 2,677	\$ 784	\$ 3,461
Miscellaneous Items						
Custodial/Non-Exchange Revenue	(106)	(98)	(204)	(1)	(193)	(194)
Non-Entity Activity	(476)	0	(476)	(1,705)	0	(1,705)
Total Other Reconciling Items	(582)	(98)	(680)	(1,706)	(193)	(1,899)
Net Outlays	\$ 6,023	\$ 1,186,429	\$ 1,192,452	\$ 6,609	\$ 1,147,306	\$ 1,153,915

The \$2,789 million increase in Benefits Due and Payable for the year ended September 30, 2021, is primarily related to amounts owed to program recipients that have not yet been paid as of the balance sheet date. The increased Benefits Due and Payable when comparing FY 2021 to FY 2020 is due primarily to a 1.3 percent Cost of Living Adjustment beneficiaries received in 2021 and an increase in the number of beneficiaries during FY 2021. This accrued payable is included in net cost, but not included in net outlays. The \$1,280 million in Acquisition of Capital Assets for the year ended September 30, 2021, primarily consists of capitalized costs associated with Internal Use Software. The purchases of assets are part of net outlays, but not part of net cost. For additional information, refer to Note 7, General Property, Plant, and Equipment, Net. The \$1,940 million in Expenditure Transfers Disbursed for the year ended September 30, 2021, is primarily related to disbursements from the OASI/DI Trust Funds to cover SSA's costs of the Railroad Retirement Interchange. The disbursements are part of net outlays, but not part of net cost. Refer to Note 9, Liabilities, for additional information on the Railroad Retirement Interchange.

For FY 2020, the \$4,080 million decrease in Accounts Receivable, \$1,733 million in Other Liabilities, and negative \$1,705 million in Non-Entity Activity, represent a decrease in Accounts Receivable and related liabilities and transfers-out to the General Fund. This is the result of our Allowance for Doubtful Accounts methodology change and our suspension of some processing of overpayments due to the COVID-19 pandemic in FY 2020.

17. SOCIAL INSURANCE DISCLOSURES

STATEMENTS OF SOCIAL INSURANCE

The Statements of Social Insurance present the present value for the 75-year projection period of the estimated future noninterest income, estimated future cost, and the excess of income over cost for both the “open group” and “closed group” of participants. The open group of participants includes all current and future participants (including those born during the projection period) who are now participating or are expected to eventually participate in the OASDI social insurance program. The closed group of participants includes only current participants (i.e., those who attain age 15 or older in the first year of the projection period). The closed group disclosure is not relevant to the financial status because the program is financed largely on a pay-as-you-go basis.

Present values are computed based on the intermediate economic and demographic assumptions described in *The 2021 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds* (2021 Trustees Report) (www.ssa.gov/OACT/TR/2021/index.html) for the 75-year projection period beginning January 1, 2021. These assumptions represent the Trustees’ reasonable estimate of likely future economic and demographic conditions. Similar present values are shown in the Statements of Social Insurance based on the prior four Trustees Reports reflecting present values on January 1 of the applicable year. Note that the projections in the 2021 Trustees Report are the first to include the Trustees’ best estimates of the effects of the COVID-19 pandemic and ensuing recession on the OASDI program.

Estimated future noninterest income consists of payroll taxes from employers, employees, and self-employed persons; revenue from Federal income-taxation of scheduled OASDI benefits; and miscellaneous reimbursements from the General Fund of the Treasury. It does not include interest income on reserves held in the combined OASI and DI Trust Funds, because the present value calculation discounts all cash flows at the effective yield on OASI and DI Trust Fund reserves. The estimated future cost includes benefit amounts scheduled under current law, administrative expenses, and net transfers with the Railroad Retirement program.

The present value of the estimated future excess of noninterest income over cost is shown in the Statements of Social Insurance, not only for the open group of participants, but also for the closed group of participants. The closed group of participants consists of those who, in the starting year of the projection period, have attained age 15 or older. This closed group is further divided into those who have attained retirement eligibility age (i.e., age 62 and over) in the starting year of the projection period and those who attained age 15 through 61 in the starting year of the projection period. The Statements of Social Insurance also present the present value of estimated future noninterest income less estimated future cost *plus* the combined OASI and DI Trust Fund reserves at the start of the period on both an open and closed group basis.

Combined OASI and DI Trust Fund reserves represent the accumulated excess of all past income, including interest on prior combined OASI and DI Trust Fund reserves, over all past expenditures for the OASDI program. The combined OASI and DI Trust Fund reserves as of January 1, 2021 totaled \$2,908 billion and were comprised entirely of investment securities that are backed by the full faith and credit of the Federal Government.

The present value for a 75-year projection period of estimated future excess of noninterest income over cost, plus the combined OASI and DI Trust Fund reserves at the start of the period, is shown as a negative value. Its magnitude is commonly referred to as the “open group unfunded obligation” of the OASDI program over the 75-year projection period. This value is included in the applicable Trustees Report and is shown in the Report as a percentage of taxable payroll and as a percentage of gross domestic product (GDP) over the period.

Because the OASDI program lacks borrowing authority, the open group unfunded obligation represents the amount of benefits scheduled in the law that would not be payable in the years after the reserves in the combined OASI and DI Trust Funds become depleted. Thus, if the reserves in the combined OASI and DI Trust Funds become depleted, the amount of money available to pay benefits and other expenses would be limited to continuing noninterest income. Therefore, barring legislative action, this unfunded obligation represents a financial shortfall that would be

accommodated by either paying benefits that are less than the amount scheduled or by delaying the payment of scheduled benefits.

ASSUMPTIONS USED FOR THE STATEMENTS OF SOCIAL INSURANCE

The present values used in this presentation for the current year (2021) are based on the full amounts of estimated noninterest income and the cost of providing benefits at the levels scheduled under current law, even after the OASI and DI Trust Fund reserves are depleted. Estimates are also based on various economic and demographic assumptions, including those in the following table:

Table 1: Significant Assumptions and Summary Measures Used for the Statement of Social Insurance 2021

	Total Fertility Rate ¹	Age-Sex-Adjusted Death Rate ² (per 100,000)	Period Life Expectancy At Birth ³		Net Annual Immigration (persons per year) ⁴	Real Wage Differential ⁵ (percentage points)	Annual Percentage Change In:				Average Annual Interest Rate ¹⁰
			Male	Female			Average Annual Wage in Covered Employment ⁶	CPI ⁷	Total Employment ⁸	Real GDP ⁹	
2021	1.54	908.3	74.6	79.9	680,000	3.16	6.22	3.06	2.7	4.4	1.5%
2030	1.87	741.5	77.0	82.0	1,339,000	1.21	3.61	2.40	0.5	2.0	4.7%
2040	1.98	683.0	78.1	82.9	1,288,000	1.19	3.59	2.40	0.3	1.9	4.7%
2050	2.00	630.3	79.2	83.8	1,256,000	1.12	3.52	2.40	0.4	2.0	4.7%
2060	2.00	583.7	80.2	84.6	1,240,000	1.16	3.56	2.40	0.4	2.0	4.7%
2070	2.00	542.3	81.1	85.4	1,229,000	1.16	3.56	2.40	0.3	1.9	4.7%
2080	2.00	505.5	82.0	86.1	1,222,000	1.13	3.53	2.40	0.4	2.0	4.7%
2090	2.00	472.7	82.8	86.7	1,218,000	1.14	3.54	2.40	0.5	2.1	4.7%
2100 ¹¹	2.00	443.3	83.6	87.4	1,216,000	1.15	3.55	2.40	0.4	2.0	4.7%

Notes:

1. The total fertility rate for any year is the average number of children that would be born to a woman if she were to experience, at each age of her life, the birth rate observed in, or assumed for, the selected year, and if she were to survive the entire childbearing period.
2. The age-sex-adjusted death rate is based on the enumerated total population as of April 1, 2010, if that population were to experience the death rates by age and sex observed in, or assumed for, the selected year. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived.
3. The period life expectancy at birth for a given year is the average number of years expected prior to death for a person born on January 1 in that year, using the mortality rates for that year over the course of his or her remaining life. It is a summary measure and not a basic assumption; it summarizes the effects of the basic assumptions from which it is derived.
4. Net annual immigration is the number of persons who enter during the year (both as lawful permanent residents and otherwise) minus the number of persons who leave during the year. It is a summary measure and not a basic assumption; it summarizes the effects of the basic assumptions from which it is derived.
5. The real wage differential is the annual percentage change in the average annual wage in covered employment less the annual percentage change in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). Values are rounded after all computations.
6. The average annual wage in covered employment is the total amount of wages and salaries for all employment covered by the OASDI program in a year, divided by the number of employees with any such earnings during the year. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived.
7. The CPI is CPI-W.
8. Total employment is total U.S. military and civilian employment. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived.
9. The real GDP is the value of the total output of goods and services in 2012 dollars. It is a summary measure and not a basic assumption; it summarizes the effects of the basic assumptions from which it is derived.
10. The average annual interest rate is the average of the nominal interest rates, compounded semiannually, for special public-debt obligations issuable to the OASI and DI Trust Funds in each of the 12 months of the year. After trust fund depletion, there would continue to be immediate investments of income in short-term certificates of indebtedness. The average annual interest rate is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived.
11. The valuation period used for the 2021 Statement of Social Insurance extends to 2095.

The present values used in the Statement of Social Insurance for the current year and in corresponding Statements in prior years are based on various economic and demographic assumptions. The values for each of these assumptions move from recently experienced levels or trends toward long-range ultimate values. These ultimate values are summarized in Table 2. Detailed information, similar to that denoted within Table 1, is available on our *Agency Financial Report* (AFR) website (www.ssa.gov/finance) for the prior four years.

Table 2: Significant Long-Range Assumptions and Summary Measures Used for the Statements of Social Insurance for Current and Prior Years

Year of Statement	Total Fertility Rate ¹	Average Annual Percentage Reduction in the Age-Sex-Adjusted Death Rates ²	Average Annual Net Immigration (persons per year) ³	Average Annual Real Wage Differential ⁴ (percentage points)	Average Annual Percentage Change In:			Average Annual Real Interest Rate ⁸
					Average Annual Wage in Covered Employment ⁵	CPI ⁶	Total Employment ⁷	
FY 2021	1.99	0.74	1,248,000	1.15	3.55	2.40	0.5	2.3
FY 2020	1.95	0.76	1,261,000	1.14	3.54	2.40	0.4	2.3
FY 2019	2.00	0.77	1,265,000	1.21	3.81	2.60	0.5	2.5
FY 2018	2.00	0.77	1,272,000	1.20	3.80	2.60	0.5	2.7
FY 2017	2.00	0.77	1,286,000	1.20	3.80	2.60	0.5	2.7

Notes:

1. The total fertility rate for any year is the average number of children that would be born to a woman if she were to experience, at each age of her life, the birth rate observed in, or assumed for, the selected year, and if she were to survive the entire childbearing period. For the Statements prior to 2021, the value presented is the ultimate total fertility rate. For the 2021 Statement, the value shown is the average annual total fertility rate for the last 65 years of the 75-year projection period.
2. The age-sex-adjusted death rate is based on the enumerated total population as of a standard date if that population were to experience the death rates by age and sex observed in, or assumed for, the selected year. For each of the listed Statements, the standard date was April 1, 2010. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived. For the Statements prior to FY 2021, the value presented is the average annual percentage reduction for each 75-year projection period. For the 2021 Statement, the value shown is the average annual percentage reduction for the last 65 years of the 75-year projection period.
3. Net annual immigration is the number of persons who enter during the year (both as lawful permanent residents and otherwise) minus the number of persons who leave during the year. The value in the table is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived. For the Statements prior to FY 2021, the value shown is the average net immigration level projected for the 75-year projection period. For the 2021 Statement, the value presented is the average net immigration level projected for the last 65 years of the 75-year projection period.
4. The annual real wage differential is the annual percentage change in the average annual wage in covered employment less the annual percentage change in the CPI-W. The value presented is the average of annual real wage differentials for the last 65 years of the 75-year projection period.
5. The average annual wage in covered employment is the total amount of wages and salaries for all employment covered by the OASDI program in a year divided by the number of employees with any such earnings during the year. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived. The value presented is the average annual percentage change from the 10th year of the 75-year projection period to the 75th year.
6. The CPI is the CPI-W. The ultimate assumption is reached within the first 10 years of the projection period.
7. Total employment is total U.S. military and civilian employment. It is a summary measure and not a basic assumption; it summarizes the basic assumptions from which it is derived. The average annual percentage change in total employment is for the entire 75-year projection period. The annual rate of increase tends to decline through the period reflecting the slowing growth rate of the working-age population. Thus, no ultimate rate of change is achieved.
8. The average annual real interest rate reflects the expected annual real yield for each year on securities issuable in the prior year. The ultimate rate is reached within the first 11 years of the projection period.

These assumptions and the other values on which Table 2 is based reflect the intermediate assumptions of the 2017–2021 Trustees Reports. The values shown in the FY 2021 row of Table 2 are consistent with the data shown in Table 1. Estimates made prior to this year may differ substantially because of revisions to the assumptions based on changes in conditions or experience, and to changes in actuarial methodology. It is reasonable to expect changes to actuarial assumptions and methodology in future reports.

Additional information on social insurance is contained in the *Required Supplementary Information: Social Insurance* section of this report.

STATEMENTS OF CHANGES IN SOCIAL INSURANCE AMOUNTS

The Statements of Changes in Social Insurance Amounts reconcile changes, from the beginning of one 75-year valuation period to the next, in the: (1) present value of estimated future noninterest income less estimated future cost for current and future participants (the open group measure) over the next 75 years; (2) starting reserves of the combined OASI and DI Trust Funds; and (3) present value of estimated future noninterest income less estimated future cost for current and future participants over the next 75 years plus the reserves of the combined OASI and DI Trust Funds. These values are included in the Statements of Social Insurance. The Statements of Changes in Social Insurance Amounts show two reconciliations: (1) change from the period beginning on January 1, 2020 to the period beginning on January 1, 2021; and (2) change from the period beginning on January 1, 2019 to the period beginning on January 1, 2020. The reconciliation identifies several changes that are significant and provides reasons for the changes.

The five changes considered in the Statements of Changes in Social Insurance Amounts are, in order:

- Change in the valuation period;
- Changes in demographic data, assumptions, and methods;
- Changes in economic data, assumptions, and methods;
- Changes in programmatic data and methods; and
- Changes in law or policy.

All estimates in the Statements of Changes in Social Insurance Amounts represent values that are incremental to the prior change. As an example, the present values shown for economic data, assumptions, and methods represent the additional effect of these new data, assumptions, and methods after considering the effects from demography and the change in the valuation period. In general, an increase in the present value of net cash flows represents a positive change (improving financing), while a decrease in the present value of net cash flows represents a negative change (worsening financing).

CHANGE IN THE VALUATION PERIOD

From the period beginning on January 1, 2020 to the period beginning on January 1, 2021

The effect on the 75-year present values of changing the valuation period from the prior valuation period (2020–2094) to the current valuation period (2021–2095) is measured by using the assumptions for the prior valuation and extending them to cover the current valuation. Changing the valuation period removes a small negative estimated net cash flow for 2020, replaces it with a much larger negative estimated net cash flow for 2095, and measures the present values as of January 1, 2021, one year later. Thus, the present value of estimated future net cash flows (excluding the combined OASI and DI Trust Fund reserves at the start of the period) decreased (i.e., became more negative) when the 75-year valuation period changed from 2020–2094 to 2021–2095. In addition, the effect on the level of reserves in the combined OASI and DI Trust Funds of changing the valuation period is measured by assuming all values projected in the prior valuation for the year 2020 are realized. The change in valuation period decreased the starting level of reserves in the combined OASI and DI Trust Funds. As a result, the present value of the estimated future net cash flows decreased by \$0.7 trillion.

From the period beginning on January 1, 2019 to the period beginning on January 1, 2020

The effect on the 75-year present values of changing the valuation period from the prior valuation period (2019–2093) to the current valuation period (2020–2094) is measured by using the assumptions for the prior valuation and extending them to cover the current valuation. Changing the valuation period removes a small negative estimated net cash flow for 2019, replaces it with a much larger negative estimated net cash flow for 2094, and measures the present values as of January 1, 2020, one year later. Thus, the present value of estimated future net cash flows (excluding the combined OASI and DI Trust Fund reserves at the start of the period) decreased (i.e., became more negative) when the 75-year valuation period changed from 2019–2093 to 2020–2094. In addition, the effect on the level of reserves in the combined OASI and DI Trust Funds of changing the valuation period is measured by assuming all values projected in the prior valuation for the year 2019 are realized. The change in valuation period decreased the starting level of reserves in the combined OASI and DI Trust Funds. As a result, the present value of the estimated future net cash flows decreased by \$0.6 trillion.

CHANGES IN DEMOGRAPHIC DATA, ASSUMPTIONS, AND METHODS

From the period beginning on January 1, 2020 to the period beginning on January 1, 2021

For the current valuation (beginning on January 1, 2021), there were two changes to the ultimate demographic assumptions and an associated change in methodology.

- The ultimate total fertility rate was increased from 1.95 to 2.00 children per woman. At the same time, the projection method was improved to project future birth rates using a cohort-based model, rather than a period-based model as used in the prior valuation.
- A cause of death category was added, by separating dementia out from the all-other-causes category, and ultimate mortality improvement rates were updated for cardiovascular disease for all age groups and for the all-other-causes category at ages 85 and over.

The combined effect of the change in the ultimate total fertility rate and the new cohort-based fertility model decreased the present value of estimated future net cash flows. The changes to ultimate mortality improvement rates increased the present value of estimated future net cash flows.

In addition to these changes in ultimate demographic assumptions and the associated methodology change, the starting demographic values and the way these values transition to the ultimate assumptions were changed. The most significant are identified below.

- Birth rate data through the third quarter of 2020 indicated somewhat lower birth rates than were assumed in the prior valuation.
- Death rates were increased significantly for 2020 and 2021, and to a lesser extent for 2022 and 2023, to account for the elevated deaths during the COVID-19 pandemic period.

Incorporating new birth rate data decreases the present value of the estimated future net cash flows, and the higher historical and near-term death rates due to the COVID-19 pandemic increase the present value of the estimated future net cash flows.

There were no additional notable changes in demographic methodology. Overall, changes in demographic data, assumptions, and methods caused the present value of the estimated future net cash flows to increase by \$0.2 trillion.

From the period beginning on January 1, 2019 to the period beginning on January 1, 2020

For the current valuation (beginning on January 1, 2020), there was one change to the ultimate demographic assumptions. The ultimate total fertility rate was lowered from 2.00 to 1.95 children per woman, reflecting a continued decline in fertility rates since 2007. The decline in the total fertility rate decreased the present value of estimated future net cash flows.

In addition to this ultimate demographic assumption change, the starting demographic values and the way these values transition to the ultimate assumptions were changed.

- Final birth rate data for 2018 and the first quarter of 2019 indicated somewhat lower birth rates than were assumed in the prior valuation.
- Incorporating 2017 mortality data obtained from the National Center for Health Statistics for ages under 65 in addition to final 2016, preliminary 2017, and preliminary 2018 mortality data from Medicare experience for ages 65 and older resulted in higher death rates for all future years than were projected in the prior valuation.

There were no notable changes in demographic methodology. Overall, changes to these assumptions caused the present value of the estimated future net cash flows to decrease by \$0.4 trillion.

CHANGES IN ECONOMIC DATA, ASSUMPTIONS, AND METHODS

From the period beginning on January 1, 2020 to the period beginning on January 1, 2021

For the current valuation (beginning on January 1, 2021), there were two changes to the ultimate economic assumptions and an associated change in methodology.

- The ultimate average real wage differential was slightly increased from 1.14 percentage points in the prior valuation to 1.15 percentage points in the current valuation. Additionally, the real wage differential assumptions for the first ten years of the projection period were also increased.
- The ultimate age-sex-adjusted unemployment rate was reduced from 5.0 percent for the prior valuation to 4.5 percent in the current valuation. At the same time, the labor force participation model was updated to incorporate data from the latest complete economic cycle, thereby putting more weight on the recent relationships among the various factors affecting labor force participation.

The higher real wage differential and the combined changes to the unemployment assumption and the labor force methodology both increased the present value of estimated future net cash flows.

In addition to these changes in ultimate economic assumptions and the associated methodology change, the starting economic values and the way these values transition to the ultimate assumptions were changed. The most significant are identified below.

- Near-term real interest rates were adjusted downward significantly. Real interest rates are now assumed to be negative for calendar years 2021 through 2024, with a gradual rise to the ultimate real interest rate after the economy has fully recovered from the recession.
- There were several changes in starting values and near-term economic growth assumptions primarily related to the COVID-19 pandemic and ensuing recession. In particular, the level of potential GDP is assumed to be roughly 1 percent lower than the level in the prior valuation beginning with the second quarter of 2020.

The changes to near-term real interest rates and the starting values and near-term economic growth assumptions decrease the present value of the estimated future net cash flows. The change to near-term real interest rates alone decreased the present value of the estimated future net cash flows by \$0.8 trillion.

There were no additional notable changes in economic methodology. Overall, changes to economic data, assumptions, and methods caused the present value of the estimated future net cash flows to decrease by \$1.2 trillion.

From the period beginning on January 1, 2019 to the period beginning on January 1, 2020

For the current valuation (beginning on January 1, 2020), there were four changes to the ultimate economic assumptions.

- The ultimate rate of price inflation (CPI-W) was lowered by 0.2 percentage point, from 2.6 percent in the prior valuation to 2.4 percent in the current valuation.
- The ultimate average real wage differential was decreased from 1.21 percentage points in the prior valuation to 1.14 percentage points in the current valuation. Most of this decrease is due to the repeal of the *Affordable Care Act* (ACA) excise tax, the effect of which is accounted for in the “Changes in Law or Policy” section. However, a small portion is due to faster assumed growth in employer-sponsored group health insurance premiums separate from this repeal.
- The ultimate age-sex-adjusted unemployment rate was reduced from 5.5 percent for the prior valuation to 5.0 percent in the current valuation. At the same time, long-term labor force participation rates were reduced by age and sex for the current valuation, such that projected employment rates remained essentially unchanged from the prior valuation to the current valuation.
- The ultimate real interest rate was lowered by 0.2 percentage point, from 2.5 percent in the prior valuation to 2.3 percent in the current valuation.

The lower ultimate price inflation rate, lower ultimate real interest rate, and the portion of the lower ultimate average real wage differential attributable to factors other than the repeal of the ACA decreased the present value of estimated future net cash flows. The combination of the lower ultimate unemployment rate and the lower long-term labor force participation rates had a negligible effect on the present value of estimated future net cash flows.

In addition to these changes in ultimate assumptions, the starting economic values and the way these values transition to the ultimate assumptions were changed. The most notable change was to include a 0.7 percent decrease in the estimated level of potential GDP for the fourth quarter of 2019 and thereafter. This and other smaller changes in starting values and near-term growth assumptions combined to decrease the present value of estimated future net cash flows.

There were no notable changes in economic methodology. Overall, changes to these assumptions caused the present value of the estimated future net cash flows to decrease by \$1.8 trillion.

CHANGES IN PROGRAMMATIC DATA AND METHODS

From the period beginning on January 1, 2020 to the period beginning on January 1, 2021

Several methodological improvements and updates of program-specific data are included in the current valuation (beginning on January 1, 2020). The most significant are identified below.

- As in the prior valuation, the current valuation uses a 10 percent sample of all newly entitled worker beneficiaries in a recent year to project average benefit levels of retired-worker and disabled-worker beneficiaries. The sample used for the current valuation is for worker beneficiaries newly entitled in 2017, one year later than the 2016 sample used for the prior valuation. There was also an improvement made to the average benefits model to assign projected earnings by age of initial entitlement, better reflecting the change between historical and projected retired worker distributions by entitlement age.
- Recent data and estimates provided by the Office of Tax Analysis at Treasury indicate lower near-term and ultimate levels of revenue from taxation of OASDI benefits than projected in the prior valuation.
- The methodology for projecting retroactive benefits for retired workers was improved to better capture the different rules for workers who become newly entitled prior to normal retirement age versus those who become entitled at or after normal retirement age.

All three of these methodological improvements decreased the present value of estimated cash flows. Overall, changes to programmatic data and methods caused the present value of the estimated future net cash flows to decrease by \$1.2 trillion.

From the period beginning on January 1, 2019 to the period beginning on January 1, 2020

Several methodological improvements and updates of program-specific data are included in the current valuation (beginning on January 1, 2020). The most significant are identified below.

- The ultimate disability incidence rate was lowered from 5.2 per thousand exposed in the prior valuation to 5.0 in the current valuation. In addition, near-term assumed disability incidence rates, in the period of transition from recent historical values to the ultimate rates, are somewhat lower in the current valuation than in the prior valuation.
- The current valuation includes an improvement in the long-range model used for projecting the percentage of the population that has fully insured status.
- As in the prior valuation, the current valuation uses a 10 percent sample of all newly entitled worker beneficiaries in a recent year to project average benefit levels of retired-worker and disabled-worker beneficiaries. The sample used for the current valuation is for worker beneficiaries newly entitled in 2016, one year later than the 2015 sample used for the prior valuation.

Lowering the disability incidence rates and the updated worker newly entitled worker sample year increased the present value of estimated future net cash flows. Updating the model for projecting the percentage of the population with fully insured status decreased the present value of estimated cash flows. Overall, changes to these assumptions and methods caused the present value of the estimated future net cash flows to increase by \$0.3 trillion.

CHANGES IN LAW OR POLICY

From the period beginning on January 1, 2020 to the period beginning on January 1, 2021

Between the prior valuation (the period beginning on January 1, 2020) and the current valuation (the period beginning on January 1, 2021), one change in policy is expected to have a significant effect on the long-range cost of the OASDI program.

On January 20, 2021, President Biden issued a memorandum directing the Secretary of Homeland Security to take appropriate action, in consultation with the Attorney General, to preserve and fortify the Deferred Action for Childhood Arrivals (DACA) policy consistent with applicable law. This change to preserve DACA extends indefinitely the ability of those qualifying to remain in the country and work lawfully. The effect over the next 75 years is to increase future benefits slightly more than future payroll tax revenue because: (1) a significant portion of the payroll taxes from this group has already been credited to the OASI and DI Trust Funds, while the vast majority of the OASDI benefits they will earn will be in the future, dependent on their preserving DACA status; and (2) currently scheduled payroll tax rates are not sufficient to fully finance future benefits for this group and in general.

The change to preserve DACA indefinitely decreased the present value of estimated future net cash flows by less than \$0.1 trillion.

From the period beginning on January 1, 2019 to the period beginning on January 1, 2020

Between the prior valuation (the period beginning on January 1, 2019) and the current valuation (the period beginning on January 1, 2020), one new law and one new regulation are expected to have significant effects on the long-range cost of the OASDI program.

- The ACA was enacted in 2010 and specified an excise tax on employer-sponsored group health insurance premiums above a given level (commonly referred to as the “Cadillac” tax). On December 20, 2019, the

ACA's excise tax provision was repealed. The repeal of the excise tax is expected to result in an increase in the rate of growth in the average cost of employer-sponsored group health insurance. Faster growth in these premiums, which are not subject to the payroll tax, is assumed to reduce the share of employee compensation that is provided in the form of wages, which are subject to the payroll tax. As a result, the rate of growth in average real covered earnings will be reduced relative to the prior valuation.

- On February 25, 2020, SSA published a final rule in the *Federal Register* that eliminates the inability to communicate in English as an educational category in the disability determination and medical review processes. This rule is estimated to reduce the number of disabled worker beneficiaries in the long-term by 0.25 percent.

The repeal of the ACA excise tax provision decreased the present value of estimated future cash flows. The implementation of the rule eliminating the inability to communicate in English as an educational category in the disability determination and medical review processes increased the present value of estimate future cash flows. Overall, changes to laws, regulations, and policies caused the present value of the estimated future net cash flows to decrease by \$0.3 trillion.

ASSUMPTIONS USED FOR THE STATEMENTS OF CHANGES IN SOCIAL INSURANCE AMOUNTS

The present values included in the Statements of Changes in Social Insurance Amounts are for the current and prior years and are based on various economic and demographic assumptions used for the intermediate assumptions in the Trustees Reports for those years. Table 1 summarizes these assumptions for the current year. Our AFR website (www.ssa.gov/finance) provides tabulated assumptions for the prior year in a similar manner.

PERIOD BEGINNING ON JANUARY 1, 2020 AND ENDING JANUARY 1, 2021

Present values as of January 1, 2020 are calculated using interest rates from the intermediate assumptions of the 2020 Trustees Report. All other present values in this part of the Statement are calculated as a present value as of January 1, 2021. Estimates of the present value of changes in social insurance amounts due to changing the valuation period and changing demographic data, assumptions, and methods are presented using the interest rates under the intermediate assumptions of the 2020 Trustees Report. Because interest rates are an economic estimate and all estimates in the table are incremental to the prior change, all other present values in this part of the Statement are calculated using the interest rates under the intermediate assumptions of the 2021 Trustees Report.

PERIOD BEGINNING ON JANUARY 1, 2019 AND ENDING JANUARY 1, 2020

Present values as of January 1, 2019 are calculated using interest rates from the intermediate assumptions of the 2019 Trustees Report. All other present values in this part of the Statement are calculated as a present value as of January 1, 2020. Estimates of the present value of changes in social insurance amounts due to changing the valuation period and changing demographic data, assumptions, and methods are presented using the interest rates under the intermediate assumptions of the 2019 Trustees Report. Because interest rates are an economic estimate and all estimates in the table are incremental to the prior change, all other present values in this part of the Statement are calculated using the interest rates under the intermediate assumptions of the 2020 Trustees Report.

18. RECLASSIFICATION OF THE STATEMENT OF NET COST AND STATEMENT OF CHANGES IN NET POSITION FOR THE FEDERAL FINANCIAL REPORT COMPILATION PROCESS

To prepare the *Financial Report of the U.S. Government* (FR), Treasury requires agencies to submit in the Government-wide Treasury Account Symbol Adjusted Trial Balance System (GTAS) an adjusted trial balance, which lists the amounts by U.S. Standard General Ledger accounts that appear in the agency financial statements. Treasury uses the trial balance reported in GTAS to develop a reclassified Balance Sheet, Statement of Net Cost, and Statement of Changes in Net Position for each agency. Treasury eliminates all intragovernmental balances from the reclassified statements and aggregates lines with the same title to compile to the FR statements. Effective FY 2021, SSA modified the Consolidated Balance Sheets and Note 10, Funds from Dedicated Collections to comply with the required format in OMB Circular No. A-136. Therefore, per OMB's guidance, SSA is not required to compile a reclassified Balance Sheet. This note includes the Statement of Net Cost and Statement of Net Position line items and the reclassified statement line items prior to Treasury's elimination of intragovernmental differences and aggregation of FR lines. The term "non-Federal" is used in this note to refer to Federal Government amounts that result from transactions with non-Federal entities. These include transactions with individuals, businesses, non-profit entities, and State, local, and foreign governments. A copy of the FY 2020 FR is available on Treasury's website (www.fiscal.treasury.gov/reports-statements/financial-report/) and a copy of the FY 2021 FR will be posted to this site as soon as it is released.

SSA's FY 2021 reconciliation of agency Statement of Net Cost and Statement of Changes in Net Position amounts to Treasury's reclassified statements is included in Charts 18a and 18b. The Reclassified Net Position in Chart 18a includes intradepartmental eliminations processed by Treasury to present the Net Position at a consolidated level. The Net Position is presented at a combined level in Agency Financial Reports.

**Chart 18a - Reclassification of Statement of Net Cost to Line Items Used for the Government-wide Statement of Net Cost for the Year Ended September 30, 2021
(Dollars in Millions)**

FY 2021 Statement of Net Cost		Line Items Used to Prepare FY 2021 Government-wide Statement of Net Cost

REQUIRED SUPPLEMENTARY INFORMATION: SOCIAL INSURANCE

PROGRAM DESCRIPTION

The Old-Age, Survivors, and Disability Insurance (OASDI) program, collectively referred to as “Social Security,” provides cash benefits for eligible U.S. citizens and residents. At the end of calendar year 2020, the Social Security Administration paid OASDI benefits to about 65 million beneficiaries. The laws applicable for the period determine eligibility and benefit amounts. Current law provides that monthly benefit payments for workers and their eligible dependents or survivors are based on workers’ lifetime earnings histories.

The OASDI program is financed largely on a pay-as-you-go basis--that is, OASDI payroll taxes paid each year by current workers are primarily used to pay the benefits provided during that year to current beneficiaries. The retired-worker benefits it pays replace a larger proportion of earned income for lower earners than for higher earners. Changes in laws governing the program may alter the amount of OASDI income (e.g., payroll taxes) and benefits.

PROGRAM FINANCES AND SUSTAINABILITY

As discussed in Note 9 to the Consolidated Financial Statements, “Benefits Due and Payable” on the balance sheet for unpaid amounts of OASDI benefits due to recipients on or before that date includes a liability of approximately \$107 billion as of September 30, 2021 (\$105 billion as of September 30, 2020). We paid virtually all of this amount in October 2021. Also, the “investments in Treasury securities” recognizes an asset of \$2,854 billion as of September 30, 2021 (\$2,908 billion as of September 30, 2020). These investments are the combined OASI and DI Trust Fund asset reserves, and represent the accumulated excess for the OASDI program of all past income, including interest, over all past expenditures. They are invested only in securities backed by the full faith and credit of the Federal Government (see Investments and Interest Receivable, Note 5).

No liability has been recognized on the balance sheet for future payments to be made to current and future program participants beyond the unpaid amounts as of September 30, 2021 because OASDI is accounted for as a social insurance program rather than as a pension program. Accounting for a social insurance program recognizes the expense of benefits when they are actually paid or are due to be paid because benefit payments are nonexchange transactions and are not considered deferred compensation as would be employer-sponsored pension benefits for employees. Accrual accounting for a pension program, by contrast, recognizes as a liability retirement benefit expenses as they are earned so that the full estimated actuarial present value of the worker’s expected retirement benefits has been recognized by the time the worker retires.

Required Supplementary Information - While there is no liability on the balance sheet for future obligations beyond those due at the reporting date, we present actuarial estimates of the long-range financial status of the OASDI program. Throughout this section, the following terms will generally be used as indicated:

- **Income:** payroll taxes from employers, employees, and self-employed persons; revenue from Federal income tax on scheduled OASDI benefits; interest income from Treasury securities held as reserves of the OASI and DI Trust Funds; and miscellaneous reimbursements from the General Fund of the Treasury;
- **Income excluding interest (Noninterest Income):** income, as defined above, excluding the interest income from Treasury securities held as reserves of the OASI and DI Trust Funds;
- **Cost:** scheduled benefit payments, administrative expenses, net transfers with the Railroad Retirement program, and vocational rehabilitation expenses for disabled beneficiaries;
- **Cash flow:** depending on the context, either income, noninterest income, or cost;

- **Net cash flow:** either income less cost or noninterest income less cost; however, net cash flow in this section refers to noninterest income less cost; and
- **Present value:** the equivalent value, as of a specified point in time and adjusted using a specified interest rate, of a future stream of payments (either income or cost). The present value of a future stream of payments may be thought of as the lump-sum amount that, if invested at the specified interest rate as of the specified point in time, together with interest earnings would be just enough to meet each of the obligations as they fall due.

All estimates in this section are based on the 75-year projections under the intermediate assumptions in *The 2021 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds* (2021 Trustees Report) (see Note 17 to the Statements of Social Insurance). The Statements of Social Insurance, the Statements of Changes in Social Insurance Amounts, and the required supplementary information below are derived from estimates of future income and cost based on these assumptions and on the current *Social Security Act*, including future changes previously enacted. The information provided in this section includes:

- (1) Present values of future estimated cost for, and estimated income (excluding interest) from, or on behalf of, current and future program participants;
- (2) Estimated annual income, income (excluding interest), and cost as percentages of taxable payroll and gross domestic product (GDP);
- (3) The ratio of estimated covered workers to estimated beneficiaries; and
- (4) An analysis of the sensitivity of the projections to changes in selected assumptions.

Sustainable Solvency - Based on the estimates of income and cost presented in the Statements of Social Insurance, the OASDI program does not meet the criteria for sustainable solvency. In order to meet the criteria for sustainable solvency, the program must be able to pay all scheduled benefits in full on a timely basis and maintain reserves in the combined OASI and DI Trust Funds at all times within the 75-year projection period. In addition, the reserves in the combined OASI and DI Trust Funds must be stable or rising as a percentage of annual program cost at the end of the period.

Cash Flow Projections - OASDI noninterest income and cost are estimated for each year from 2021 through 2095. Charts 1 through 4 show annual cash flow projections for the OASDI program. However, income including interest is only estimated through 2034, the year that the reserves in the combined OASI and DI Trust Funds are projected to deplete. After the point of such depletion, no interest earnings would be available. Moreover, because the program lacks the authority to borrow to continue paying benefits, benefit payments would be limited to the available tax income (noninterest income). Therefore, displaying annual income levels beyond the point of combined OASI and DI Trust Fund depletion would be inappropriate unless the cost of scheduled benefits was replaced by the amount of benefits that would be payable.

Estimates are for the open-group population (i.e., all persons projected to participate in the OASDI program as covered workers or beneficiaries, or both during that period). Therefore, the estimates include payments from, and on behalf of, workers who will enter covered employment during the period as well as those already in covered employment at the beginning of that period. They also include the cost of scheduled benefits for such workers and their dependents during that period.

Amounts as a Percentage of Taxable Payroll - Chart 1 shows estimated annual income, noninterest income, and cost through 2034 expressed as percentages of taxable payroll. Chart 2 is an extension of Chart 1, showing estimated annual noninterest income and cost through 2095 expressed as percentages of taxable payroll.

As presently constructed, the program receives most of its income from the 6.2 percent payroll tax that employees and employers each pay on taxable wages and salaries (for a combined payroll tax rate of 12.4 percent) and the 12.4 percent that is paid on taxable self-employment income. Prior to 2021, income including interest exceeded cost in every year since 1983. As Chart 1 shows, estimated cost starts to exceed income including interest in 2021. As Chart 2 shows, estimated cost, expressed as a percentage of taxable payroll, increases through 2078 and then slightly declines through the end of the 75-year period. The estimated income at the end of the 75-year period is sufficient to cover 74 percent of the estimated cost.

The increase in estimated cost through 2078 occurs because of a variety of factors, including the retirement of the baby boom generation, the relatively small number of people born during the subsequent period of lower birth rates, and the projected increases in life expectancy, which increase the average number of years of receiving benefits relative to the average number of years of paying taxes. The decrease in estimated cost after 2078 occurs as the relatively smaller generations born during the period of reduced birth rates following the recession of 2007–2009 increasingly begin to retire.

Estimated annual cost is projected to exceed noninterest income in all years of the projection period. In any year, to meet all OASDI cost on a timely basis, the combined OASI and DI Trust Funds will need to redeem Treasury securities. This redemption differs from the situation of prior years when the combined OASI and DI Trust Funds

had been net lenders to the General Fund of the Treasury. The Government could finance this redemption by increasing its borrowing from the public, raising taxes (other than OASDI payroll taxes), and/or reducing expenditures (other than OASDI cost). Alternatively, the Government could make this redemption unnecessary by changing the law to increase OASDI taxes and/or reduce OASDI scheduled benefits as needed.

Actuarial Balance - The Statements of Social Insurance show that the present value of the excess of income (excluding interest) over cost for the 75-year period is -\$22,742 billion. If augmented by the combined OASI and DI Trust Fund reserves at the start of the period (January 1, 2021), it is -\$19,833 billion. This excess does not equate to the actuarial balance in the 2021 Trustees Report of -3.54 percent of taxable payroll because the actuarial balance includes the cost of attaining a target combined OASI and DI Trust Fund level at the end of the period equal to total projected cost for the 76th year of the period.

For the combined OASI and DI Trust Funds to remain solvent throughout the 75-year projection period, revenues would have to increase by an amount equivalent to an immediate and permanent payroll tax increase of 3.36 percentage points (from its current level of 12.40 percent to 15.76 percent). One interpretation of the actuarial balance is that its magnitude, 3.54 percent, should equal the necessary increase. However, the increase is different primarily because the necessary tax rate is the rate required to maintain solvency throughout the period that results in no reserves in the OASI and DI Trust Funds at the end of the period, whereas the actuarial balance incorporates an ending reserve in the OASI and DI Trust Funds equal to one year's cost. While such an increase in the payroll tax rate would cause some behavioral changes in earnings and ensuing changes in benefit levels, such changes are not included in this calculation because they are assumed to have roughly offsetting effects on OASDI actuarial status over the 75-year long-range period as a whole.

Alternatively, solvency could be achieved by reducing scheduled benefits by an amount equivalent to an immediate and permanent reduction of about 21 percent applied to all current and future beneficiaries, or about 25 percent if the reductions were applied only to newly entitled beneficiaries. Finally, some combination of both tax increases and benefit reductions could be adopted.

Amounts as a Percentage of Gross Domestic Product - Chart 3 shows estimated annual income, noninterest income, and cost through 2034 expressed as percentages of GDP. Chart 4 is an extension of Chart 3, showing estimated annual noninterest income and cost through 2095 expressed as percentages of GDP. Analyzing these cash flows in terms of percentage of the estimated GDP, which represents the total value of goods and services produced in the United States, provides a measure of the cost of the OASDI program in relation to the size of the national economy that must finance it.

In calendar year 2020, OASDI cost was about \$1,107 billion, which was about 5.3 percent of GDP. The cost of the program (based on current law) rises to a peak of 6.2 percent of GDP in 2077, then declines to 5.9 percent by 2095. The increase from 2021 to 2039 will occur as baby boomers continue to become eligible for OASDI benefits, lower birth rates result in fewer workers per beneficiary, and beneficiaries continue to live longer. The decrease near the end of the 75-year projection period occurs as the relatively smaller generations born during the period of reduced birth rates following the recession of 2007–2009 increasingly begin to retire.

Ratio of Workers to Beneficiaries - Chart 5 shows the estimated number of covered workers per OASDI beneficiary using the Trustees' intermediate assumptions. As defined by the Trustees, covered workers are persons having earnings creditable for OASDI purposes based on services for wages in covered employment and/or income from covered self-employment. The estimated number of workers per beneficiary declines from 2.7 in 2020 to 2.1 in 2095.

SENSITIVITY ANALYSIS

Projections of the future financial status of the OASDI program depend on many demographic and economic assumptions, including fertility, mortality, net immigration, average wages, inflation, and interest rates on Treasury securities. The income will depend on how these factors affect the size and composition of the working population and the level and distribution of wages and earnings. Similarly, the cost will depend on how these factors affect the size and composition of the beneficiary population and the general level of benefits. Because actual experience is likely to differ from the estimated or assumed values of these factors, we include this section to illustrate the sensitivity of the long-range projections to changes in assumptions by analyzing six key assumptions: total fertility rate, mortality, net immigration, real wage differential, Consumer Price Index (CPI), and real interest rate. The range of values chosen for the sensitivity analysis presents a reasonable range within which we expect future experience to fall, on average, over long time periods. We do not intend the range of values to represent any particular probability interval around the intermediate assumptions, nor are the endpoints of the range intended to represent the absolute best or worst scenario.

For this analysis, we use the intermediate assumptions in the 2021 Trustees Report as the reference point. Each selected assumption is varied individually. We note that due to the interactions between assumptions, changes in any single assumption may have additional effects on other assumptions. We calculate all present values as of January 1, 2021 and base them on estimates of income and cost during the 75-year projection period 2021–2095. In this section, for brevity, “income” means “noninterest income.”

We present one table and one chart for each assumption analyzed. The table shows the present value of the estimated excess of OASDI income over cost based on each of three selected values of the assumption being analyzed. If the excess is negative, we refer to it as a shortfall. The middle values provided correspond to the intermediate assumption of the Trustees. The chart shows the present value of each annual net cash flow.

Sensitivity of program cost to changes in multiple assumptions is also useful. The 2021 Trustees Report presents high-cost and low-cost alternative assumption sets, which combine the variations shown individually in this report. It should be noted that due to interactions, the combined effect of two or more assumption changes may not be equal to the sum of the effects shown separately. The Trustees, in their annual report, also include estimates using a stochastic model developed by the Office of the Chief Actuary. These estimates provide an additional way of analyzing the uncertainty and variability in assumptions, income, and cost.

Total Fertility Rate - Table 1 shows the present value of the estimated excess of OASDI income over cost for the 75-year period, for each of the three sets of assumptions about the total fertility rate. The average annual total fertility rates for the period 2031 through 2095 are 1.69, 1.99, and 2.19 children per woman, where 1.99 is the intermediate summary value for the 2021 Trustees Report. The total fertility rate under all three sets of total fertility rate assumptions changes gradually from its current low level and will reach the ultimate value of 1.70, 2.00, and 2.20, respectively in 2056.

Table 1 demonstrates that if the average annual total fertility rate were changed from 1.99 children per woman, consistent with the Trustees’ intermediate assumption, to 1.69, the shortfall for the period of estimated OASDI income relative to cost would increase to \$25,789 billion from \$22,742 billion; if the average annual total fertility rate changed to 2.19, the shortfall would decrease to \$20,589 billion.

Table 1: Present Value of Estimated Excess of OASDI Income over Cost With Various Total Fertility Rate Assumptions
Valuation Period: 2021–2095

Average Total Fertility Rate (from 2031 through 2095)	1.69	1.99	2.19
Present Value of Estimated Excess (Dollars in Billions)	\$(25,789)	\$(22,742)	\$(20,589)

Using the same total fertility rates used for the estimates in Table 1, Chart 6 shows the present value of the estimated annual OASDI net cash flows.

The three patterns of the present values shown in Chart 6 are similar. Under all three sets of assumptions, the present values are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three sets of fertility rate assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then again begin to increase around 2040. The net cash flow estimates corresponding to the average total fertility rate of 1.69 are mostly stable in years 2040–2045, decrease in years 2046–2077, and then increase through 2095. The net cash flow estimates corresponding to the average total fertility rate of 1.99 mostly increase in years 2039–2054, decrease in years 2055–2074, and then increase through 2095. The net cash flow estimates corresponding to the average total fertility rate of 2.19 increase in years 2039–2094 before a slight decrease in 2095.

Mortality - Table 2 shows the present values of the estimated excess of OASDI income over cost for the 75-year period, using various assumptions about future reductions in death rates. We developed the analysis by varying the reduction assumed to occur in future death rates by age, sex, and cause of death. The reductions assumed for this period, summarized as average annual reductions in the age-sex-adjusted death rate for the period 2030 to 2095, are 0.28, 0.74, and 1.25 percent per year. The intermediate assumption in the 2021 Trustees Report is 0.74 percent. (The resulting cumulative decreases in the age-sex-adjusted death rate during the same period are 16, 38, and 56 percent, respectively.) The life expectancy at birth, on a unisex period life table basis, is projected to rise from 77.0 in 2020 to 80.9, 85.1, and 89.4 in 2095 for average annual reductions in the age-sex-adjusted death rate of 0.28, 0.74, and 1.25 percent, respectively.

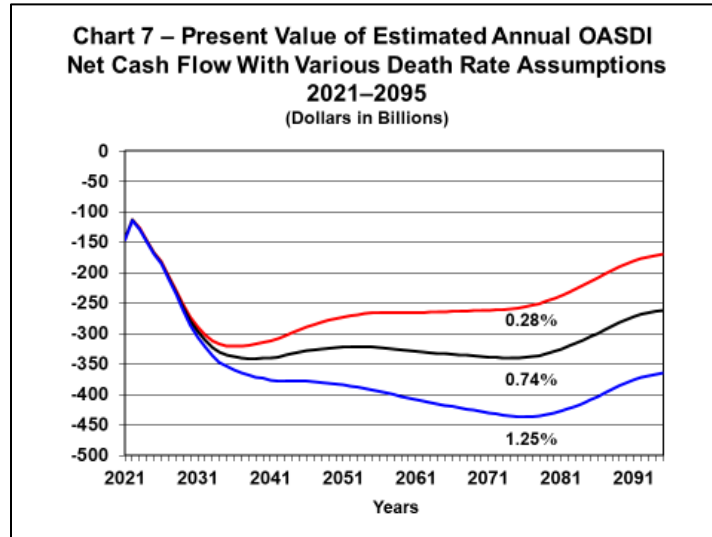

Table 2 demonstrates that if the annual reduction in death rates were changed from 0.74 percent, the Trustees' intermediate assumption, to 0.28 percent, meaning that people die younger, the shortfall for the period of estimated OASDI income relative to cost would decrease to \$18,723 billion from \$22,742 billion; if the annual reduction were changed to 1.25 percent, meaning that people live longer, the shortfall would increase to \$27,530 billion.

Table 2: Present Value of Estimated Excess of OASDI Income over Cost With Various Death Rate Assumptions
Valuation Period: 2021–2095

Average Annual Reduction in Death Rates (from 2030 through 2095)	0.28 Percent	0.74 Percent	1.25 Percent
Present Value of Estimated Excess (Dollars in Billions)	\$(18,723)	\$(22,742)	\$(27,530)

Using the same assumptions about future reductions in death rates used for the estimates in Table 2, Chart 7 shows the present value of the estimated annual OASDI net cash flows.

The three patterns of the present values shown in Chart 7 are similar. Under all three sets of assumptions, the net cash flow estimates are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three sets of assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then begin at least a small increase by 2043. The net cash flow estimates corresponding to a 1.25 percent average annual reduction in the age-sex-adjusted death rate briefly increase in years 2043–2044, decrease in years 2045–2076, and then increase through 2095. The net cash flow estimates corresponding to a 0.74 percent average annual reduction mostly increase in years 2039–2054, decrease in years 2055–2074, and then increase through 2095. The net cash flow estimates corresponding to a 0.28 percent average annual reduction increase in years 2037–2058, briefly decrease in years 2059–2061, and then increase through 2095.

Net Annual Immigration - Table 3 shows the present values of the estimated excess of OASDI income over cost for the 75-year period, using various assumptions about the magnitude of annual immigration. The immigration assumptions include the levels of lawful permanent resident (LPR) immigration, legal emigration, other-than-LPR immigration, and other-than-LPR emigration. Based on these levels, projected net annual immigration (LPR and other-than-LPR) will average 830,000 persons, 1,248,000 persons, and 1,688,000 persons over the period 2031 through 2095, where 1,248,000 persons is the average value based on the intermediate assumptions in the 2021 Trustees Report.

Table 3 demonstrates that if the Trustees' intermediate immigration assumptions were changed so that the average level for the period 2031 through 2095 decreased from 1,248,000 persons to 830,000 persons, the present value of the shortfall for the period of estimated OASDI income relative to cost would increase to \$24,128 billion from \$22,742 billion. If, instead, the immigration assumptions were changed so that net annual immigration would be expected to average 1,688,000 persons, the present value of the shortfall would decrease to \$21,271 billion.

Table 3: Present Value of Estimated Excess of OASDI Income over Cost With Various 75-Year Average Net Annual Immigration Assumptions
Valuation Period: 2021–2095

Average Net Annual Immigration (from 2031 through 2095)	830,000 Persons	1,248,000 Persons	1,688,000 Persons
Present Value of Estimated Excess (Dollars in Billions)	\$(24,128)	\$(22,742)	\$(21,271)

Using the same assumptions about net annual immigration used for the estimates in Table 3, Chart 8 shows the present value of the estimated annual OASDI net cash flows.

The three patterns of the present values shown in Chart 8 are similar. Under all three sets of assumptions, the net cash flow estimates are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three sets of assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then again begin to increase around 2040. Therefore, in terms of today’s investment dollar, annual OASDI net cash flow, although still negative, begins to increase at that time. Under all three sets of assumptions, net cash flows have another period of decreasing present values around years 2055–2075 before again increasing through 2095.

Immigration generally occurs at relatively young adult ages, so there is no significant effect on beneficiaries (and, therefore, on benefits) in the early years of the projection period, but the effect on the numbers of workers (and, therefore, on payroll tax income) is immediate. Therefore, even in the early years of the projection period, the present values, year by year, are generally higher (i.e., less negative in later years) for higher net annual immigration. However, benefits paid in a given year to earlier immigrant cohorts of the projection period eventually offset the increased payroll taxes for that year. Therefore, the present values based on the three assumptions about net annual immigration become more similar at the end of the projection period.

Real Wage Differential - The annual real wage differential is the difference between the percentage increases in: (1) the average annual wage in OASDI covered employment; and (2) the average annual CPI. The real wage differential assumption is expressed as the average of the annual real wage differential for the last 65 years of the 75-year projection period (from 2031 through 2095). Table 4 shows the present values of the estimated excess of OASDI income over cost for the 75-year period, using various assumptions about the real wage differential. These assumptions are that the average real wage differential will be 0.53, 1.15, and 1.77 percentage points. The intermediate assumption in the 2021 Trustees Report is 1.15 percentage points. In each case, the ultimate annual increase in the CPI is assumed to be 2.40 percent (as used in the intermediate assumptions), yielding average

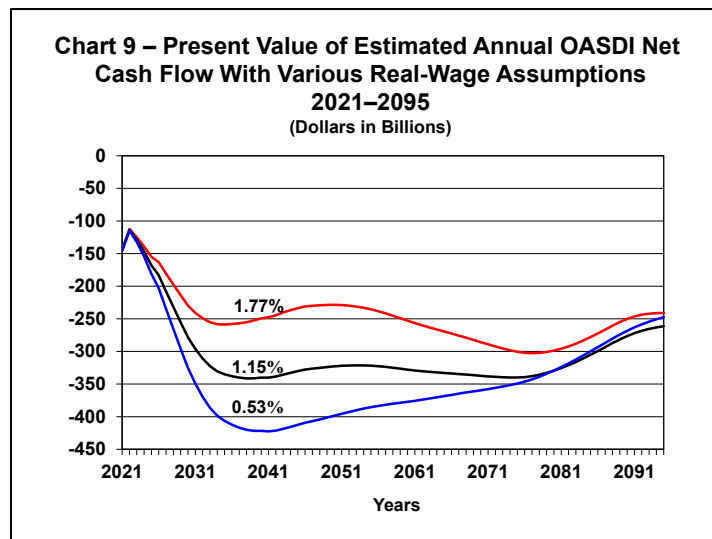

percentage increases in the average annual wage in covered employment of 2.93, 3.55, and 4.17 percent, respectively, in the last 65 years of the 75-year projection period.

Table 4 demonstrates that if the average real wage differential were changed from 1.15 percentage points, the Trustees' intermediate assumption, to 0.53 percentage point, the shortfall for the period of estimated OASDI income relative to cost would increase to \$25,390 billion from \$22,742 billion; if the average real wage differential were changed from 1.15 to 1.77 percentage points, the shortfall would decrease to \$18,579 billion.

Table 4: Present Value of Estimated Excess of OASDI Income over Cost With Various Real Wage Assumptions
Valuation Period: 2021–2095

Average Annual Increase in Wages, CPI; Real Wage Differential (from 2031 through 2095)	2.93%, 2.40%; 0.53%	3.55%, 2.40%; 1.15%	4.17%, 2.40%; 1.77%
Present Value of Estimated Excess (Dollars in Billions)	\$(25,390)	\$(22,742)	\$(18,579)

Using the same assumptions about the real wage differential used for the estimates in Table 4, Chart 9 shows the present value of the estimated annual OASDI net cash flows.

The net cash flow estimates corresponding to all three sets of assumptions are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three sets of assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then begin to increase (i.e., become less negative) by 2042. Therefore, in terms of today's investment dollar, annual OASDI net cash flow, although still negative, begins to increase at that time. For the assumed real wage differential of 0.53 percentage point, the present values increase from 2042 through the remainder of the projection period. The net cash flow estimates corresponding to an assumed real wage differential of 1.15 percentage points mostly increase in years 2039–2054, decrease in years 2055–2074, and then increase through 2095. The net cash flow estimates corresponding to an assumed real wage differential of 1.77 percentage points increase in years 2036–2050, decrease in years 2051–2077, and then increase through 2095.

Differences among the estimates of annual net cash flow based on the three assumptions about the real wage differential become apparent early in the projection period. Higher real wage differentials increase both wages and initial benefit levels. Because the effects on wages and, therefore, on payroll taxes are immediate, while the effects on benefits occur with a substantial lag, annual net cash flow is higher for higher assumed real wage differentials. In the early years, when the effects on benefits are quite small and the effects on wages are compounding, the patterns of the estimates of annual net cash flow based on the three assumptions diverge fairly

rapidly. However, toward the end of the projection period, annual net cash flow becomes more similar for all assumed real wage differentials. This occurs because benefits would then be more fully realized at a time when the projected cost substantially exceeds noninterest income. These effects are depicted by the patterns in Chart 9 coming together at the end of the projection period.

Consumer Price Index - Table 5 shows the present values of the estimated excess of OASDI income over cost for the 75-year period, using various assumptions about the rate of change in the CPI. These assumptions are that the ultimate annual increase in the CPI will be 1.80, 2.40, and 3.00 percent. All three ultimate assumptions are reached by year 2024. The intermediate assumption in the 2021 Trustees Report is 2.40 percent. In each case, the average real wage differential is assumed to be 1.15 percentage points (as used in the intermediate assumptions), yielding average percentage increases in average annual wages in covered employment of 2.95, 3.55, and 4.15 percent, respectively.

Table 5 demonstrates that if the ultimate annual increase in the CPI were changed from 2.40 percent, the Trustees' intermediate assumption, to 1.80 percent, the shortfall for the period of estimated OASDI income relative to cost would increase to \$23,327 billion from \$22,742 billion; if the ultimate annual increase in the CPI were changed to 3.00 percent, the shortfall would decrease to \$22,174 billion. The seemingly counterintuitive result that higher CPI increases result in decreased shortfalls (and vice versa) is explained by the time lag between the effects of the CPI changes on taxable payroll and on benefit payments. The effect on taxable payroll due to a greater increase in average wages is experienced immediately, while the effect on benefits is experienced with a lag of about one year. For this reason, larger increases in the CPI cause earnings and income to increase sooner and, therefore, by more each year, than benefits and cost.

Table 5: Present Value of Estimated Excess of OASDI Income over Cost With Various CPI-Increase Assumptions Valuation Period: 2021–2095

Average Annual Increase in Wages, CPI; Real Wage Differential (from 2031 through 2095)	2.95%, 1.80% ; 1.15%	3.55%, 2.40% ; 1.15%	4.15%, 3.00% ; 1.15%
Present Value of Estimated Excess (Dollars in Billions)	\$(23,327)	\$(22,742)	\$(22,174)

Using the same assumptions about the annual increase in the CPI used for the estimates in Table 5, Chart 10 shows the present value of the estimated annual OASDI net cash flows.

The net cash flow estimates corresponding to all three sets of assumptions are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three CPI-increase assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then again begin to increase by 2040. The net cash flow estimates corresponding to an ultimate 1.8 percent CPI mostly increase in years 2040–2053, decrease in years 2054–2074, and then increase through 2095. The net cash flow estimates corresponding to an ultimate 2.4 percent CPI mostly increase in years 2039–2054, decrease in years 2055–2074, and then increase through 2095. The net cash flow estimates corresponding to an ultimate 3.0 percent CPI increase in years 2039–2054, decrease in years 2055–2075, and then increase through 2095.

Real Interest Rate - Table 6 shows the present values of the estimated excess of OASDI income over cost for the 75-year period, using various assumptions about the annual real interest rate for special-issue Treasury obligations sold to the OASI and DI Trust Funds. These assumptions are that the ultimate annual real interest rate will be 1.8, 2.3, and 2.8 percent. All three ultimate rates are reached by 2031. The intermediate assumption in the 2021 Trustees Report is 2.3 percent. Changes in real interest rates change the present value of cash flows, even though the cash flows do not change.

Table 6 demonstrates that if the ultimate real interest rate were changed from 2.3 percent, the Trustees’ intermediate assumption, to 1.8 percent, the shortfall for the period of estimated OASDI income relative to cost, when measured in present-value terms would increase to \$26,986 billion from \$22,742 billion; if the ultimate annual real interest rate were changed to 2.8 percent, the present-value shortfall would decrease to \$19,364 billion.

Table 6: Present Value of Estimated Excess of OASDI Income over Cost With Various Real Interest Assumptions Valuation Period: 2021–2095

Ultimate Annual Real Interest Rate	1.8 Percent	2.3 Percent	2.8 Percent
Present Value of Estimated Excess (Dollars in Billions)	\$(26,986)	\$(22,742)	\$(19,364)

Using the same assumptions about the annual real interest rate used for the estimates in Table 6, Chart 11 shows the present value of the estimated annual OASDI net cash flows.

The three patterns of the present values shown in Chart 11 are similar. The net cash flow estimates corresponding to all three sets of assumptions are negative in all years of the 75-year projection period. The net cash flow estimates corresponding to all three real interest rate assumptions increase (become less negative) in 2022, before decreasing rapidly into the 2030s and then begin to increase by 2043. Therefore, in terms of today’s investment dollar, annual OASDI net cash flow, although still negative, begins to increase (i.e., become less negative) at that time. The net

cash flow estimates corresponding to an ultimate real interest rate of 1.8 increase in years 2043–2046, decrease in years 2047–2077, and increase through 2095. The net cash flow estimates corresponding to an ultimate real interest rate of 2.3 mostly increase in years 2039–2054, decrease in years 2055–2074, and then increase through 2095. The net cash flow estimates corresponding to an ultimate real interest rate of 2.8 increase in years 2038–2095.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Office of the Inspector General
SOCIAL SECURITY ADMINISTRATION

November 10, 2021

The Honorable Kilolo Kijakazi
Acting Commissioner of Social Security

The Office of the Inspector General (OIG) contracted with the independent certified public accounting firm Grant Thornton LLP (Grant Thornton) to audit (1) the Social Security Administration's (SSA) consolidated financial statements as of September 30, 2021 and 2020, and the related notes to the consolidated financial statements; (2) the sustainability financial statements, including the statements of social insurance as of January 1, 2021, 2020, 2019 and 2018, and the related notes to the sustainability financial statements; and (3) the statements of changes in social insurance amounts for the periods January 1, 2020 to January 1, 2021 and January 1, 2019 to January 1, 2020. The OIG also contracted with Grant Thornton to provide an opinion on internal control over financial reporting and report on compliance with laws, regulations, contracts, grant agreements, and other matters, including the requirements of the *Federal Financial Management Improvement Act of 1996*. The contract requires that the audit be performed in accordance with auditing standards generally accepted in the United States; *Government Auditing Standards* issued by the Comptroller General of the United States; and Office of Management and Budget Bulletin No. 21-04, *Audit Requirements for Federal Financial Statements*. Those Standards and Bulletin require that Grant Thornton plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement and whether effective internal control over financial reporting was maintained in all material respects.

This letter transmits Grant Thornton's *Report of Independent Certified Public Accountants*. Grant Thornton found the following.

- The consolidated and sustainability financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States.
- SSA management maintained, in all material respects, effective internal control over financial reporting as of September 30, 2021. However, Grant Thornton identified three significant deficiencies in internal control: (1) Certain Financial Information Systems Controls, (2) Information Systems Risk Management, and (3) Accounts Receivable with the Public (Benefit Overpayments).
- No reportable instances of noncompliance with laws, regulations, contracts, grant agreements and other matters.

OFFICE OF THE INSPECTOR GENERAL EVALUATION OF GRANT THORNTON AUDIT PERFORMANCE

To fulfill our responsibilities under the *Chief Financial Officers Act of 1990* and related legislation for ensuring the quality of the audit work performed, we monitored Grant Thornton's audit of SSA's consolidated and sustainability financial statements by:

- evaluating the independence, objectivity, and qualifications of the auditors and specialists;
- reviewing Grant Thornton's audit approach and planning;
- monitoring the audit's progress at key points;
- examining Grant Thornton's documentation related to planning the audit, assessing SSA's internal control, and substantive testing;
- reviewing Grant Thornton's audit report to ensure compliance with Government Auditing Standards and Office of Management and Budget Bulletin No. 21-04;
- coordinating the issuance of the audit report; and
- performing other procedures we deemed necessary.

Grant Thornton is responsible for the attached auditors' report, dated November 10, 2021, and the opinions and conclusions expressed therein. The OIG is responsible for technical and administrative oversight regarding Grant Thornton's performance under the contract terms. Our review, as differentiated from an audit in accordance with applicable auditing standards, was not intended to enable us to express, and, accordingly, we do not express, an opinion on SSA's consolidated financial statements; sustainability financial statements; internal control over financial reporting; or compliance with certain laws, regulations, contracts and grant agreements. However, our monitoring review, as qualified above, disclosed no instances where Grant Thornton did not comply, in all material respects, with applicable auditing standards.

Consistent with our responsibility under the *Inspector General Act*, we are providing copies of this report to congressional committees with oversight and appropriation responsibilities over SSA. In addition, we will post a copy of the report on our public Website.

Gail S. Ennis
Inspector General

GRANT THORNTON LLP

111 South Calvert Street, Suite 2320
Baltimore, MD 21202

D 410 685 4000
F 410 837 0587

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Kilolo Kijakazi, Acting Commissioner
Social Security Administration

Gail S. Ennis, Inspector General
Social Security Administration

In our audits of the Social Security Administration (SSA), we found:

- The consolidated balance sheets of SSA as of September 30, 2021 and 2020, the related consolidated statements of net cost and changes in net position, and the combined statements of budgetary resources for the years then ended, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America;
- The sustainability financial statements which comprise the statements of social insurance as of January 1, 2021, 2020, 2019 and 2018 and the statements of changes in social insurance amounts for the period January 1, 2020 to January 1, 2021 and January 1, 2019 to January 1, 2020 are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America;
- Although internal controls could be improved, SSA management maintained, in all material respects, effective internal control over financial reporting as of September 30, 2021; and
- No reportable instances of noncompliance for fiscal year 2021, with provisions of applicable laws, regulations, contracts, and grant agreements we tested.

The following sections discuss in more detail (1) our report on the financial statements and internal control over financial reporting, which includes an emphasis of matter paragraph related to the sustainability financial statements, and required supplementary information (RSI) and other information included with the financial statements, (2) our report on compliance with laws, regulations, contracts, and grant agreements, and (3) the Agency's response to findings.

Grant Thornton LLP is the U.S. member firm of Grant Thornton International Ltd (GTIL). GTIL and each of its member firms are separate legal entities and are not a worldwide partnership.

Report on the financial statements and internal control over financial reporting

We have audited the accompanying financial statements of the Social Security Administration (the “Agency”), which comprise the consolidated financial statements and the sustainability financial statements. The consolidated financial statements comprise the consolidated balance sheets as of September 30, 2021 and 2020, and the related consolidated statements of net cost, changes in net position, and the combined statements of budgetary resources for the years then ended, and the related notes to the consolidated financial statements.

The sustainability financial statements comprise the statements of social insurance as of January 1, 2021, 2020, 2019, and 2018, the statements of changes in social insurance amounts for the periods January 1, 2020 to January 1, 2021 and January 1, 2019 to January 1, 2020, and the related notes to the sustainability financial statements.

We also have audited the internal control over financial reporting of the Social Security Administration as of September 30, 2021, based on criteria established under 31 U.S.C. § 3512 (c),(d) (commonly known as the Federal Managers’ Financial Integrity Act or “FMFIA”) and in *Standards for Internal Control in the Federal Government*, issued by the Comptroller General of the United States.

Management’s responsibility for the financial statements and internal control over financial reporting

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of effective internal control over financial reporting relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management is also responsible for evaluating the effectiveness of internal control over financial reporting based on the criteria established under FMFIA and its assessment about the effectiveness of internal control over financial reporting as of September 30, 2021, included in the accompanying Acting Commissioner’s Assurance Statement.

Auditor’s responsibility

Our responsibility is to express opinions on these financial statements and an opinion on the entity’s internal control over financial reporting based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and Office of Management and Budget (“OMB”) Bulletin 21-04, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin 21-04 require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement and whether effective internal control over financial reporting was maintained in all material respects.

An audit of financial statements involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Agency’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit of financial statements also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

An audit of internal control over financial reporting involves performing procedures to obtain audit evidence about whether a material weakness exists. The procedures selected depend on the auditor's judgment, including the assessment of the risk that a material weakness exists. An audit of internal control over financial reporting also involves obtaining an understanding of internal control over financial reporting and testing and evaluating the design and operating effectiveness of internal control over financial reporting based on the assessed risk. Our audit of internal control also considered the Agency's process for evaluating and reporting on internal control over financial reporting based on criteria established under FMFIA. Our audits also included performing such other procedures as we considered necessary in the circumstances.

We did not evaluate all internal controls relevant to operating objectives as broadly established under FMFIA, such as those controls relevant to preparing performance information and ensuring efficient operations. We limited our internal control testing to testing controls over financial reporting. Our internal control testing was for the purpose of expressing an opinion on whether effective internal control over financial reporting was maintained, in all material respects. Consequently, our audit may not identify all deficiencies in internal control over financial reporting that are less severe than a material weakness.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Definition and inherent limitations of internal control over financial reporting

An entity's internal control over financial reporting is a process affected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting provides reasonable assurance that (1) transactions are properly recorded, processed, and summarized to permit the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and assets are safeguarded against loss from unauthorized acquisition, use, or disposition, and (2) transactions are executed in accordance with provisions of applicable laws, including those governing the use of budget authority, regulations, contracts and grant agreements, noncompliance with which could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements due to fraud or error. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Agency's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Opinions on the financial statements

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Social Security Administration as of September 30, 2021 and 2020, and its net cost, changes in net position, and budgetary resources for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Also, in our opinion, the sustainability financial statements referred to above present fairly, in all material respects the Social Security Administration's social insurance information as of January 1, 2021, 2020, 2019, and 2018 and its changes in social insurance amounts for the periods January 1, 2020 to January 1, 2021 and January 1, 2019 to January 1, 2020, in accordance with accounting principles generally accepted in the United States of America.

Emphasis of matter

As discussed in Note 17 to the financial statements, the sustainability financial statements are based on management's assumptions. These sustainability financial statements present the actuarial present value of the Agency's estimated future income to be received and future expenditures to be paid using a projection period sufficient to illustrate long-term sustainability. The sustainability financial statements are intended to aid users in assessing whether future resources will likely be sufficient to sustain public services and to meet obligations as they come due. The statements of social insurance and changes in social insurance amounts are based on income and benefit formulas in current law and assume that scheduled benefits will continue after any related trust funds are exhausted. The sustainability financial statements are not forecasts or predictions. The sustainability financial statements are not intended to imply that current policy or law is sustainable. In preparing the sustainability financial statements, management considers and selects assumptions and data that it believes provide a reasonable basis to illustrate whether current policy or law is sustainable. Assumptions underlying such sustainability information do not consider changes in policy or all potential future events that could affect future income, future expenditures, and sustainability, for example, implementation of policy changes to avoid trust fund exhaustion. Because of the large number of factors that affect the sustainability financial statements and the fact that future events and circumstances cannot be estimated with certainty, even if current policy is continued, there will be differences between the estimates in the sustainability financial statements and the actual results, and those differences may be material. Our opinion is not modified with respect to this matter.

Opinion on internal control over financial reporting

In our opinion, although certain internal controls could be improved, the Social Security Administration maintained, in all material respects, effective internal control over financial reporting as of September 30, 2021, based on criteria established under 31 U.S.C § 3512 (c),(d) (commonly known as FMFIA) and in *Standards for Internal Control in the Federal Government*, issued by the Comptroller General of the United States.

As discussed in more detail, our fiscal year 2021 audit identified deficiencies in the Agency's controls over Certain Financial Information Systems Controls, Information Systems Risk Management and Accounts Receivable with the Public (Benefit Overpayments) described in the accompanying Appendix *Significant Deficiencies in Internal Control Over Financial Reporting*, that collectively represent significant deficiencies in the Agency's internal control over financial reporting. We considered these significant deficiencies in determining the nature, timing, and extent of our audit procedures on the Agency's fiscal year 2021 financial statements. Although the significant deficiencies in internal control did not affect our opinion on the Agency's fiscal

year 2021 financial statements, misstatements may occur in unaudited financial information reported internally and externally by the Agency because of these significant deficiencies.

In addition to the significant deficiencies in internal control over Certain Financial Information Systems Controls, Information Systems Risk Management and Accounts Receivable with the Public (Benefit Overpayments), we also identified deficiencies in the Agency's internal control over financial reporting that we do not consider to be material weaknesses or significant deficiencies. Nonetheless, these deficiencies warrant management's attention. We have communicated these matters to management and, where appropriate, will report on them separately.

Other matters

The sustainability financial statements of the Agency as of and for the year ended January 1, 2017 were audited by other auditors. That auditors' report, dated November 9, 2017, expressed an unmodified opinion on those 2017 financial statements and included an emphasis of matter paragraph that described the assumptions upon which the sustainability financial statements are based discussed in Note 17 to the financial statements.

Required supplementary information

Accounting principles generally accepted in the United States of America require that the information in Management's Discussion and Analysis from pages 5 through 36, the combining schedule of budgetary resources, and the required supplementary social insurance information from pages 92 through 106 be presented to supplement the basic financial statements. Such information, although not a required part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board and OMB Circular A-136, *Financial Reporting Requirements*, which consider it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Management is responsible for preparing, measuring, and presenting the required supplementary information in accordance with accounting principles generally accepted in the United States of America. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America. These limited procedures consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other information

Our audits were conducted for the purpose of forming an opinion on the basic financial statements as a whole. The Acting Commissioner's Message on page 1 and the other information on pages 2 through 4, 37 through 42, 88 through 91, and 125 through 166 are presented for purposes of additional analysis and are not a required part of the basic financial statements. Management is responsible for preparing and presenting other information included in documents containing the audited financial statements and auditor's report, and for ensuring the consistency of that information with the basic financial statements and the required supplementary information. We read the other information in order to identify material inconsistencies, if any, with the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Report on compliance with laws, regulations, contracts, grant agreements and other matters

As part of obtaining reasonable assurance about whether the Agency's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements consistent with the auditor's responsibility discussed below, in accordance with *Government Auditing Standards*. Noncompliance may occur that is not detected by these tests.

Management's responsibility

Management is responsible for complying with laws, regulations, contracts, and grant agreements applicable to the Agency.

Auditor's responsibility

Our responsibility is to test compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements, and perform certain other limited procedures. We did not test compliance with all laws, regulations, contracts, and grant agreements.

Results of our tests of compliance with laws, regulations, contracts, and grant agreements

The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. However, the objective of our tests was not to provide an opinion on compliance with laws, regulations, contracts, and grant agreements applicable to the Agency. Accordingly, we do not express such an opinion.

Under the Federal Financial Management Improvement Act ("FFMIA"), we are required to report whether the Agency's financial management systems substantially comply with FFMIA Section 803(a) requirements. To meet this requirement, we performed tests of compliance with the federal financial management systems requirements, applicable federal accounting standards, and the *United States Standard General Ledger* ("USSGL") at the transaction level. However, providing an opinion on compliance with FFMIA was not an objective of our audit, and accordingly we do not express such an opinion. The results of our tests of FFMIA Section 803(a) requirements disclosed no instances of substantial noncompliance that are required to be reported under FFMIA.

Agency's response to findings

The Agency's response to our findings, which is included on page 124 of this Agency Financial Report, was not subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion on the Agency's response.

Intended purpose of report on compliance with laws, regulations, contracts, and grant agreements

The purpose of this report is solely to describe the scope of our testing of compliance and the results of that testing, and not to provide an opinion on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering compliance. Accordingly, this report is not suitable for any other purpose.

Grant Thornton LLP

Baltimore, Maryland

APPENDIX – SIGNIFICANT DEFICIENCIES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

Significant Deficiency in Internal Control over Certain Financial Information Systems Controls

Overview

Social Security Administration (SSA) management relies on information systems and technology (IT) to administer the Old-Age and Survivors Insurance (OASI) and Disability Insurance (DI) (collectively known as OASDI) and Supplemental Security Income (SSI) programs; to process and account for their expenditures; and for financial reporting.

Our internal control testing included IT general and application controls. Testing IT general controls encompassed the security management program, access controls (physical and logical), configuration and change management, segregation of duties, and service continuity/contingency planning. IT general controls provide the foundation for the integrity of systems including applications and the system software that comprise the general support systems for the major applications. General and application-level controls are critical to ensuring the accurate and complete processing of transactions and integrity of stored data. Application controls include application-specific general controls, input, processing of data, and output of data as well as interface, master file, and other user controls. These controls provide assurance over the completeness, accuracy, and validity of data. Our audit included testing of the Agency's mainframe, networks, databases, applications, and other supporting systems. Our audit was conducted for Headquarters as well as off-site locations.

The Federal Information Processing Standards 199, *Standards for Security Categorization of Federal Information and Information Systems*, and 200, *Minimum Security Requirements for Federal Information and Information Systems*, are mandatory security standards in the *Federal Information Security Modernization Act of 2014*. These standards, combined with National Institute of Standards and Technology (NIST) Special Publication 800-53, Revision 4, *Security and Privacy Controls for Federal Information Systems and Organizations*, define a framework for Federal agencies to develop, document, and implement an Agency-wide information security program. The information security program is required to provide security protections commensurate with the risk and magnitude of the harm that could result from the unauthorized access, use, disclosure, disruption, modification, or destruction of Agency information and information systems.

Deficiencies in Control Design and/or Operational Effectiveness

We noted deficiencies in access controls, network security controls, and configuration management that contribute to an aggregated significant deficiency in information system controls. While SSA continued strengthening controls over its information systems and IT, many of the control deficiencies from past audits persisted. SSA has developed several plans, strategies, and initiatives to address control deficiencies; however, these deficiencies continued to exist because of one, or a combination, of the following:

- SSA was in the process, but had not fully implemented, automated mechanisms for monitoring compliance with key control activities as well as within their security assessment and authorization processes;
- SSA had not remediated control deficiencies noted in prior audits; and
- the design of enhanced or newly designed controls had not completely addressed risks identified and recommendations provided in past audits.

Access Controls

Access controls provide assurance that critical information systems' assets are physically safeguarded and logical access to sensitive applications, system utilities, and data are provided only when authorized and appropriate. Weaknesses in such controls can compromise the integrity of data and increase the risk that such data may be inappropriately accessed, modified, and/or disclosed by unauthorized persons, which may affect the accuracy of the financial statements. Our testing identified failures related to logical access controls at disability determination services (DDS), including logical access reviews/access recertification, the review of inactive user accounts, and segregation of duties. We also noted physical access control failures including the timely removal of physical access for separated DDS personnel and with physical access reviews/recertification. Our testing at SSA Headquarters identified control failures related to privileged users including the identification and review of logical access for privileged users, completeness and accuracy of reviews for the activities of individuals granted temporary privileged access to the mainframe, and review of mainframe system administrator activities. Further, we noted exceptions related to controls to prevent programmer access to the production environment. More specifically, SSA implemented a secondary user identification process to give programmers access to production data through a monitored, time-limited process. During testing, we determined this control was not operating effectively, as SSA was not reviewing and approving the access timely. Finally, we identified control failures related to the timely removal of logical access for separated SSA personnel.

Network Security Controls

Critical components of effective network security controls include, but are not limited to, configuration management, limiting access based on need-to-know/least privileged, and logging and monitoring of sensitive activities. Related processes and controls must be designed to prevent or detect such weaknesses as misconfigurations and vulnerabilities to combat internal and external cyber-threats, exploitations, and unauthorized access. We identified network security and inventory deficiencies, many of which persisted from prior audits.

Configuration Management

Configuration management involves the identification and management of security features for hardware, software, and firmware components of an information system at a given point while controlling changes to that configuration as part of the systems' life cycle. A disciplined process is required so configurations align with security standards and to ensure no unauthorized changes are implemented to configuration settings. We noted SSA needed to improve its controls over (1) hardening security configuration baselines (that is, providing prescriptive guidance on deploying and operating IT in a secure manner); (2) determining adherence to these baselines and guides through periodic monitoring; and (3) assessing, remediating, and/or justifying, assessing risk and approving deviations (if applicable). SSA also needs to improve controls for retaining evidence of testing, review, and approval of system software changes in its mainframe environment.

While these findings did not have a material impact on the financial statements, a lack of appropriately designed or implemented internal controls for information systems and related IT increases the risk of unreliable data and misstatements whether due to fraud or error and jeopardizes the programs' integrity.

Recommendations

To mitigate the risks of the issues noted in the significant deficiency, management should consider the following:

1. Analyze the audit findings to identify root causes and trends, assess risk of control failures, and re-evaluate priorities for remediation. SSA should develop and/or review its risk-based approach and develop a roadmap of corrective actions. SSA should set attainable milestones for corrective actions and remediate these deficiencies timely.
2. Strengthen SSA's internal control system for access controls, network security, and configuration management to improve its effectiveness in identifying, documenting, and linking these controls to business processing controls that support financial reporting; assessing the design and effectiveness of these controls; and remediating any identified IT control gaps.

Significant Deficiency in Information Systems Risk Management

Overview

A dynamic, flexible, and robust information system/IT risk management program is essential to managing security and privacy risk in SSA's diverse IT environment. As threats evolve and become more sophisticated, complex, and numerous, appropriate risk management is required to build security into new systems, mitigate existing and emerging threats, and ensure essential mission support services are available. Further, IT risk management is needed to protect the confidentiality, integrity, and availability of SSA's financial and program information.

SSA must implement a risk management program that provides reasonable assurance that risks are identified and assessed, and controls are appropriately designed and operating effectively across the Agency's information systems and locations. Through the Agency's security management program, SSA's risk management framework must include a continuous cycle of activity for developing and assessing the discipline and structure of its control environment, assessing risk, developing and implementing effective security procedures, communicating, and monitoring the effectiveness of those procedures.

IT risk management must also be integrated, deployed, and communicated throughout the entity, divisions, operating units, and functions. SSA executive oversight, management and personnel are responsible for information security and privacy. Office of Management and Budget (OMB) Memorandum M-17-25, *Reporting Guidance for Executive Order on Strengthening the Cybersecurity of Federal Networks and Critical Infrastructure* provides Federal agencies implementation guidance to meet risk management reporting requirements. The memorandum states:

An effective enterprise risk management program promotes a common understanding for recognizing and describing potential risks that can impact an agency's mission and the delivery of services to the public. Such risks include . . . cyber . . . and a broad range of operational risks such as information security . . . Effective management of cybersecurity risk requires that agencies align information security management processes with strategic, operational, and budgetary planning processes

Deficiencies in Control Design and/or Operational Effectiveness

We noted improvement in SSA's communication of IT risks and control requirements across its offices and its commitment to integrity and oversight of internal controls. For example, SSA implemented a security review board to assess control deficiencies and prioritize remediation, implemented a compliance dashboard, deployed Information System Security Officers (ISSO) strategically throughout its organization, and implemented procedures for performing oversight and monitoring of some DDS control requirements. However, we continue to identify recurring issues regarding processes, people, and technology in place to support SSA's IT risk management function that persist from prior audits.

- Processes – We noted SSA's processes lacked the following.
 - Repeatable and standardized risk management practices that were consistently applied and implemented across the organization at the entity, divisions, operating units and functions. For example, we noted control failures related to regional office security assessment and authorization processes, performance of risk assessments, vulnerability scanning of applications, and issuance and monitoring of plans of action and milestones (POA&M). Furthermore, as part of our Headquarters testing, we cited control deficiencies related to the information security monitoring and enforcement of contractor systems, completeness and accuracy of information system inventories and boundaries, common control inheritance considerations, a lack of completed requirements in security assessment and authorization packages, not consistently documenting justifications for delays or categorizing the criticality of POA&Ms, and out of date information system contingency plans.
 - A clear and concise security architecture function. SSA did not consistently incorporate assessing the impacts to the Agency's information system development lifecycle necessary for maintaining a disciplined and structured methodology for managing risk. This also includes not having procedures to assess aggregate level risk or comprehensive tools for monitoring risk, risk response types, and risk dependencies.
- People – Per the *Standards for Internal Control in the Federal Government* OV1.06, "People are what make internal control work. Management is responsible for an effective internal control system. As part of this responsibility, management sets the entity's objectives, implements controls, and evaluates the internal control system. However, personnel throughout an entity play important roles in implementing and operating an effective internal control system." We noted SSA's Information System Security Officers (ISSOs) were deployed to the regional offices in Fiscal Year 2021. However, the ISSOs had not yet developed and implemented their roles and responsibilities to include consideration of risks identified in regional office security assessments of field office and DDS sites. Further, we noted that on-site security assessments in some regions were suspended for Fiscal Year 2021.
- Technology – We noted SSA did not consistently and/or effectively deploy technology to manage its IT risk management function. SSA had made progress in this area but was still implementing and/or tuning software in many instances. For example, we continued to note issues with information system hardware and software inventory management, lack of a Network Access Control (NAC) technology solution, automation and tools for managing security configurations, and comprehensive tools to evaluate and communicate risks.

These findings did not have a material impact on the financial statements; however, they could have such negative effects as inaccurate security categorization of systems and applications;

ineffective identification, implementation and documentation of required controls; inappropriate testing and monitoring of those controls; and approving authorization to operate packages for the system without an appropriate understanding of risks.

Recommendations

To mitigate the risks of the issues noted in the significant deficiency, management should consider the following:

1. Implementing and revising, as needed, the existing information system risk management framework(s) and strategy, using NIST 800-37 Rev. 2, *Risk Management Framework for Information Systems and Organizations: A System Life Cycle Approach for Security and Privacy* to consistently apply risk management practices Agency-wide. In addition, develop and implement a consistent approach to risk management within its security architecture and system development life-cycle processes and continue efforts to revise system boundaries and control inheritance as part of the Agency's effort to transition to ongoing authorization of its information systems.
2. Continue efforts to integrate deployed information security resources at various levels within the organization to implement and monitor SSA's revised risk management practices and provide the appropriate level of recurring training to individuals with internal control and information security responsibilities.
3. Review its current governance, risk, and compliance tools and software and consider additional tools and automation within its risk management practices and security controls.

Significant Deficiency in Internal Control over Accounts Receivable with the Public (Benefit Overpayments)

Overview

A benefit overpayment exists when beneficiaries receive payments beyond their entitled amount. When SSA detects a benefit overpayment, it records an accounts receivable with the public to reflect the amount due SSA from the beneficiary. Because of the nature of the benefit payment programs, SSA has extensive operations geographically dispersed nationwide. Overpayment detection, calculation, and documentation occur in various places throughout SSA, including approximately 1,200 field offices, 8 processing centers, and various functional areas within SSA's central office. Therefore, SSA has specific policies, procedures, and internal controls in place to consistently detect, calculate, and document overpayments and the related accounts receivable balances. Since the benefit overpayment process can be complex for some cases and relies on manual input, SSA's adherence to its internal controls is critical to accurately recording, documenting, and tracking overpayment balances. Management also relies on its IT infrastructure, interfaces, and controls to record and prevent erroneous payments.

Reconciliation of the Supplemental Security Income Accounts Receivable Ledger

OMB Circular A-123, Appendix D, *Compliance with Federal Financial Management Improvement Act* (OMB Circular A-123), requires that the United States Government Standard General Ledger be applied at the transaction level. For its OASDI and SSI programs, SSA tracks individual debtor overpayment transactions and accounts receivable balances in subsidiary ledger systems and adjusts the general ledger according to the balances reported from the subsidiary ledgers. As in prior years, our current-year testing revealed the detail-level beneficiary information in the SSI accounts receivable subsidiary ledger did not agree with the summary-level reports from the SSI subsidiary ledger.

SSA relies on these summary-level reports to update the general ledger; therefore, the SSI accounts receivable program balances reported in the general ledger and subsequently the financial statements, differ from the supporting detail-level beneficiary data in the SSI subsidiary ledger system.

System limitations prevent SSA from reconciling the SSI differences between the detail and summary-level information in the subsidiary ledger. This could lead to misstatements of the financial statements; however, the unreconciled differences are immaterial to the financial statements and the accounts receivable with the public line items.

Deficiencies in Benefit Overpayment Documentation and Calculations

We noted that prior audits identified significant deficiencies in internal controls related to SSA adhering to *Program Operations Manual System* criteria regarding maintaining sufficient evidence to support benefit overpayment balances or sufficient evidence to support approval of waived overpayments. The *Program Operations Manual System* provides important policies, procedures, and internal controls over processing and documenting overpayments. Based on evidence obtained during our business process walkthroughs, we determined, in Fiscal Year 2018, SSA had developed updated training for field and regional office personnel on obtaining and maintaining documentation necessary to support claims for overpayments and approval of waived overpayments. However, our inquiries of management since these enhancements, including inquiries made during the current year, revealed that improvements in the operating effectiveness of this internal control process were not expected.

Professional standards dictate that, when an auditor deems a control to have been ineffective in the prior year, and management indicates there has been no improvement, the auditor need not test it in the current year. Therefore, we did not test a separate sample of new overpayments or waived overpayments identified in Fiscal Year 2021 for internal control effectiveness. In prior years, our testing disclosed that SSA did not follow established policy or maintain proper documentation to support overpayments and waivers. This can lead to difficulties in calculating and substantiating outstanding accounts receivable balances and potential misstatements to accounts receivable with the public balance presented on the financial statements.

To test the recorded amount of accounts receivable with the public, we selected a statistical sample of outstanding OASDI and SSI overpayment balances and noted overpayment calculation errors in 4 (15 percent) of 26 sampled OASDI items and 3 (9 percent) of 32 sampled SSI items. Although the statistically projected impact of these calculation errors was not material to the financial statements, these errors further evidence control weaknesses in the accounts receivable with the public processes, including inappropriate overpayment tracking that could lead to misstatements in the financial statements.

Deficiencies in Overpayment Records and Tracking for Long-term Installment Payments

Beneficiaries can request to repay overpayment balances in monthly installments as withholdings from monthly benefit payments. Depending on the amount of the overpayment balance and the amount of each installment payment, repayment periods can extend beyond December 2049.

According to Statement of Federal Financial Accounting Standards (SFFAS) 1, *Accounting for Selected Assets and Liabilities*, a receivable should be recognized when a Federal entity establishes a claim to cash or other assets against other entities, either based on legal provisions, such as a payment due date, (for example, taxes not received by the date they are due), or goods or services provided. If the amount is unknown, a reasonable estimate should be made. Further, SFFAS 7, *Accounting for Revenue and Other Financing Sources and*

Concepts for Reconciling Budgetary and Financial Accounting states that accounts receivable should be recognized when a collecting entity establishes a specifically identifiable, legally enforceable claim to cash or other assets through its established assessment processes to the extent the amount is measurable.

We noted that SSA identified a system design process limitation concerning long-term withholding agreements that extend past December 2049 where the system cannot capture and track debt scheduled for collection beyond December 2049. Therefore, the accounts receivable balances related to these overpayments are understated in the amount of the installment payments expected to be collected beyond December 2049. The projected understatements are immaterial to the financial statements and the accounts receivable with the public balance. While the Agency is enhancing system capabilities to properly account for these receivables and updating policies to avoid longer-term repayment programs, failure to resolve the system-design process limitation will continue understating accounts receivable balances. In addition, the impact of this issue will continue to grow as December 2049 approaches if other factors remain constant.

Deficiencies in Tracking Delayed Adverse Actions on Reviewed Cases

In response to the COVID-19 pandemic, OMB issued Memorandum M-20-16, *Federal Agency Operational Alignment to Slow the Spread of Coronavirus COVID-19*, on March 17, 2020, which provided agencies direction for restructuring day-to-day business processes to ensure continuous public service toward their mission-critical activities while keeping employees and the public safe. Accordingly, the Agency suspended certain disability program monitoring workloads to focus on its mission-critical activities. Additionally, for reviews the Agency did conduct, it temporarily delayed effectuating any action that would adversely affect the beneficiary (that is, cessation or reduction of the related benefits).

In FY 2020, we recommended that the Agency design and implement a process for tracking deferred adverse actions on disability reviews to ensure actions were taken once the Agency resumed normal operations and to determine the financial statement impact of the delayed actions. In FY 2020, SSA did begin using a control to manually track these deferred actions and in FY 2021, the Agency used the resulting information to estimate the financial statement impact of cases that met the criteria for deferment. However, the Agency did not maintain evidence to support the population of manually tracked cases and other underlying data and assumptions used in its estimate. Further, the Agency performed its estimate as of February 2021 and did not update the estimate as of the fiscal year end. As a result, we were unable to test implementation of the manual control or determine reasonableness of the estimated impact on the Agency's benefit payments expense and accounts receivable balances as of September 30, 2021. Additionally, the Agency represented that the manual control to track deferred actions was not operating effectively and determined that the number of tracked cases was likely understated.

While the amounts associated with the deferred adverse actions are not deemed material to the financial statements, the deficiencies described above demonstrate the Agency's reliance on an inconsistently implemented manual control that could result in extended delays in processing adverse actions and therefore understating the amount of overpaid benefits owed by the public.

Recommendations

To mitigate the risks of the issues noted in the significant deficiency, management should consider the following:

Reconciliation of the SSI Accounts Receivable Ledger

1. Continue implementing and executing SSI reconciliation internal controls between subsidiary ledgers at the detail level and the general ledger, through summary reports. Investigate and document reconciling differences on a periodic and timely manner.
2. Investigate potential system reporting enhancements to reduce unreconciled differences between summary- and detail-level data produced by subsidiary ledgers.

Deficiencies in Benefit Overpayment Documentation and Calculations

1. Continue exploring opportunities to improve overpayment accuracy and document retention through engaging field office and payment center employees in trainings related to common weaknesses and more complex overpayment cases.
2. Enhance management review of overpayment processing considering such risk-based factors as current overpayment balances, manual intervention required, and age.
3. Consider implementing new overpayment documentation tools to ensure overpayments are documented completely, accurately, and timely by field offices or processing centers within the appropriate systems of record.

Deficiencies in Overpayment Records and Tracking Long-term Installment Payments

1. Continue working toward updated debt management systems without the technical limitations over the length of time repayment installments can be recorded.
2. Continue pursuing changes in repayment policy to minimize future extended repayment plans.
3. Continue analyzing and tracking the impact of the December 2049 system design process limitation on the financial statements.

Deficiencies in Tracking Delayed Adverse Actions on Reviewed Cases

1. Continue pursuing enhancements to capture deferred actions that occurred as a result of the COVID-19 pandemic and deferred actions that may result in the future.
2. Implement a process for maintaining documentation that evidences operation of the tracking process and resulting estimates of financial statement impact. This should include evidence to support the underlying inputs and assumptions used to determine the financial statement impact of such delayed actions.

Baltimore, MD 21202

Dear Sir or Madam:

We have reviewed the Report of Independent Certified Public Accountants concerning our fiscal year (FY) 2021 financial statements. We are pleased we received our 28th consecutive unmodified opinion on our financial statements, an unqualified opinion that our internal control over financial reporting was operating effectively, and we had no reportable instances of noncompliance with laws, regulations, or other matters tested.

We are equally pleased your testing identified that we made substantial progress addressing your recommendations under the prior year significant deficiency concerning internal control over disability program monitoring. We acknowledge that continued work is needed to address that finding, which has now been moved under the significant deficiency related to internal control over accounts receivable with the public (benefit overpayments).

In this year's financial statement audit, you cited three significant deficiencies identified in prior years. The significant deficiencies concern internal control over certain financial information systems controls, information systems risk management, and internal control over accounts receivable with the public (benefit overpayments).

While each year we make progress in remediating elements of these significant deficiencies, we face challenges such as the ever-changing cybersecurity landscape in which we operate. We are resolving the deficiencies identified by audits through risk-based corrective action plans to mitigate risks and strengthen our control environment. Many elements of our remediation plans will take time to implement.

We appreciate both your efforts and the efforts of the Office of the Inspector General. The independent audit process continues to provide us with valuable recommendations, and we remain committed to excellence in financial management.

If members of your staff have any questions, they may contact Christian Hellie, Acting Associate Commissioner for the Office of Financial Policy and Operations, at 410-965-9511.

Sincerely,

Kilolo Kijakazi
Acting Commissioner
